

# Regulation Tables are Easy to Use!

1. Watershed Unit

2. Bait regulations for Watershed

3. Site-specific regulations for lakes and streams

5. The legend contains information on symbols and fish names

4. Default regs for waterbodies not listed in the tables

## ZONE 3 Northern Boreal

**ZONE 3** – A vast area of central and northern Alberta consists of boreal forest. Throughout the boreal forest, many of the streams are low gradient, brown water streams from musky drainages. These streams are tributaries within larger watersheds, which in turn are part of the major drainage basins of the Athabasca, Peace and Hay rivers. The majority of the lakes in Alberta occur in the boreal forest zone. The popular game fish of the zone are yellow perch, northern pike, walleye, lake whitefish, Arctic grayling and lake trout. Zone 3 is subdivided into four Watershed Units (NB1 – NB4).

**NB1 SPOTLIGHTED REGULATIONS**  
**Bait Fishing:** (see definition for bait on page 15)  
**Ice fishing:** angling is not permitted through the ice; a) into beaver ponds or b) into flowing waters

**Arctic Grayling have a 0 limit throughout Alberta. See Species at Risk on page 14.**

### WATERSHED UNIT NB1

the Beaver River watershed and the Athabasca River watershed between the 100th and 110th longitudes or 100°W and 110°W, excepting Sec. Rd. 813 (near the town of Athabasca), including the Calling River watershed, and the La Biche River watershed (NOTE: the tributary watersheds, including several lakes in the "Lakeland District," entering on the left [north] bank of the North Saskatchewan downstream of Highway 38 near Redwater are also part of Watershed Unit NB1).

### A record waiting to be broken.

*Cold Lake, Alberta*

Since 1929, Cold Lake has held the record for the largest Alberta Lake Trout. Legends say the fish known as the Kinsoo is still out there, hiding in the deep waters of Cold Lake. Will you be the one to reel it in?

*M29, 52 lb 8oz lake Trout caught by Mrs. Erickson*

6. Look up a specific waterbody

7. Regulations for a specific waterbody

8. When you see a ● follow the column UP for the default regulations of the waterbody and species

Legend: ● = Default regulations for Fish Management Zone NB1. As examples '3 over 63' indicates a possession and a size limit and '3' or '10' indicates a possession limit of that species. An empty cell indicates the species is not available at that waterbody. SHL = Special Harvest Licence, BKTR = brook trout, BNTR = brown trout, BURB = burbot, CISC = cisco, CTRR = cutthroat trout, DLVR = dolly varden, GOLD = goldeye, LKTR = lake trout, LKWH = lake whitefish, MNWH = mountain whitefish, NRPK = northern pike, RNTR = rainbow trout, SAUG = sauger, TGTR = tiger trout, WALL = walleye, YLPR = yellow perch. Waterbodies highlighted in blue have a change in regulation.

NB1 - Lakes, Reservoirs and Ponds											
Waterbody	Waterbody Detail	Season	Bait & Gear	WALL	NRPK	YLPR	LKWH	BURB	LKTR	Trout Total	
Default regulations for NB1 lakes, reservoirs and ponds			Open May 15 to Mar. 31 Closed during dates not listed	Bait allowed	3 over 50 cm	3 over 63 cm	15 fish	10 fish	10 fish	3 fish	
All lakes within Lakeland Provincial Park	Including Blackett, Dabbs, Helena, Jackson, Kinnaird, McGuffin, Shaw and Snake Lakes; Species limit is combined and applies to all waters	●	●	1 over 50 cm	1 over 63 cm	●	●	●	●	●
