# 2021 Deer Hunters

## Your Role in CWD Surveillance

Ongoing Chronic Wasting Disease Surveillance shifted focus in 2020 to better support game management decisions. The program targets specific wildlife management units (WMUs) along the Alberta/Saskatchewan border and along the leading edges of the CWD risk area. However, as always, we accept any cervid legally harvested in Alberta for testing. Depending on where and what you hunt, the risk of harvesting an infected deer ranges from very low to very high. CWD is most common in local mule deer bucks in parts of eastern Alberta. For more information and previous data check the CWD web pages at [alberta.ca/chronic-wasting-disease-updates](http://alberta.ca/chronic-wasting-disease-updates)

For 2021, it is **MANDATORY** to submit **DEER** heads from WMUs 150, 151, 163, 200, 224, 226, 234, 236, 242, 244, 246, 248 (as modified in 2021), 250, 402, 404, 501, 502, 504, 506, 514, 728, and 730.

**Mandatory MULE DEER ONLY** in WMUs - 102, 104, 106, 108, 110, 112, 130, 132, 210, 212, 214, 216, 220, 221, 222, 304, 305, 306, 308, 310, 312, and 314.

Heads for testing must have a green CWD label that provides a unique identification number for each deer head submitted. Pick up labels and instructions after you shoot your deer. They are available at Fish and Wildlife offices or, during rifle seasons, at 24-hour freezers in CWD mandatory areas. **COMPLETELY FILL OUT BOTH SIDES OF THE GREEN LABEL, PARTICULARLY A PRECISE KILL LOCATION AND YOUR WIN NUMBER.**

Heads should be kept frozen and dropped off at any Fish and Wildlife office or any of the freezers. CWD test results are provided via email to hunters as soon as possible.

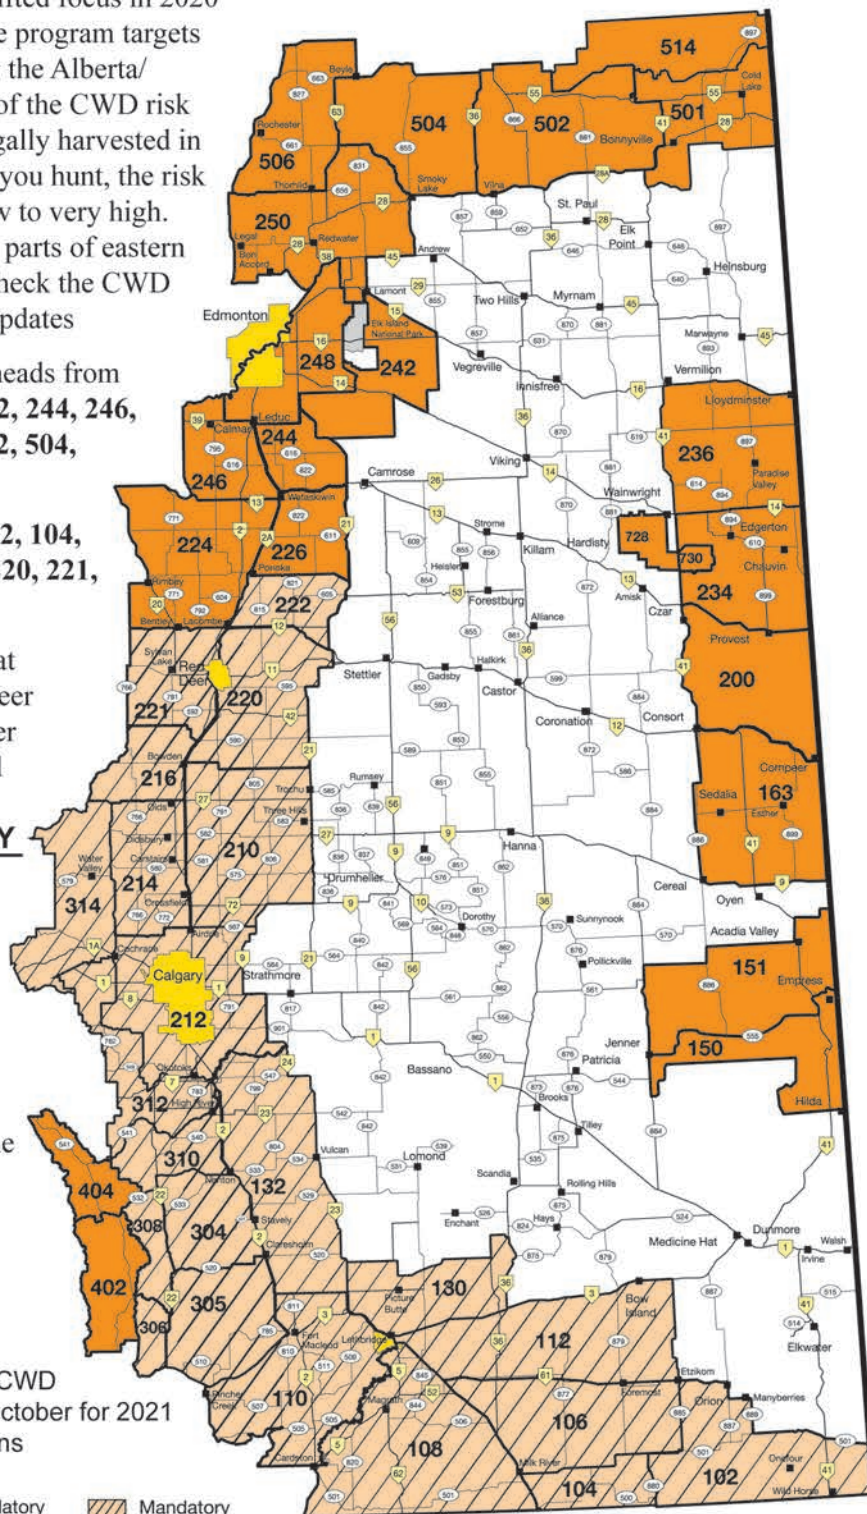

For more detailed information about CWD, visit the Alberta Environment and Parks, wildlife diseases website <https://alberta.ca/chronic-wasting-disease> or contact Dr. M. Pybus (780) 427-3462. Dial 310-0000 first for toll-free long distance calls.

Health authorities state that CWD is not known to infect humans. However, as a precaution authorities, including the World Health Organization (WHO), advise against eating animals infected with any prion disease.

**Note:** Check CWD web page in October for 2021 freezer locations

## Genesee Hunting Program

Capital Power at the Genesee Generating Station and Mine, south west of Edmonton, is continuing their hunting program that includes black powder rifles, cross bows, shotguns, and archery. This program provides excellent hunting opportunities for the public in an area well known for its Whitetail and Mule Deer populations.

The program, in partnership with Hunting for Tomorrow, is open to all eligible hunters. There is no cost to participate, but there are specific rules that all participants must adhere to regarding site access.

**Public access to Capital Power's land at Genesee is only permitted through the Hunting for Tomorrow program.**

The mentorship hunting program is also still active. This program pairs youth participants and first time hunters with a qualified mentor to receive one-on-one hunting instruction and opportunities.

**Genesee staff are on the land 24-hours a day and at risk if you hunt in unauthorized areas.**

*Please protect yourself and others.  
We appreciate your cooperation.*

Hunting for Tomorrow administers all hunting on Capital Power land. For more information or to apply to hunt at Genesee contact: Chuck Strong, chuck@acheia.com

# Message from the Honourable Jason Nixon

**I**t's easy to understand why hunting continues to be such a popular pastime here in Alberta. Our province's diverse landscape and wildlife populations offer a memorable hunting experience that can be enjoyed with family and friends.

Alberta's hunting heritage is rich and deeply engrained in our province. Hunting allows us to connect meaningfully with nature and enjoy the outdoors, and provides a healthy, sustainable source of food. Game meat is a great source of lean, organic protein and can be a nice menu change for a family dinner. Sharing such a meal also provides an occasion for memories of the hunting experience to be shared and enjoyed again.

I am pleased to acknowledge that the number of female hunters in Alberta has increased by 72% in the last 5 years – nearly 10,000 new female hunters have been welcomed to the sport. This reflects the success of the entire hunting community in Alberta by driving inclusive participation in great outdoor experiences.

As the minister responsible for fish and wildlife, my focus is to ensure Alberta is home to sustainable populations of game species so we can continue to offer memorable hunting experiences, while encouraging our young people to participate in conservation.

This requires striking the right balance between providing additional hunting opportunities, where sustainable, while implementing improved conservation measures. Doing this will ensure future generations are able to enjoy the same great hunting experience that we all enjoy today.

For new hunters, draw wait times for some special licences can be lengthy. I encourage new hunters

and all experienced hunters to take advantage of the many general tag opportunities available. This will help achieve harvest goals established to support sustainable populations while minimizing wildlife conflicts with agricultural producers, improve public safety on our roadways and address game population impacts of wildlife disease.

The COVID-19 pandemic has led many Albertans to discover or re-discover a variety of outdoor recreation activities, including hunting. Last year saw an increase in hunting licence sales and I expect 2021 will be another strong year for hunting participation in Alberta.

Hunting is an activity that can be enjoyed safely while following all public health guidelines to help protect yourself and others against the spread of COVID-19. The latest updates and guidelines can be found at [alberta.ca/coronavirus-info-for-albertans.aspx](http://alberta.ca/coronavirus-info-for-albertans.aspx).

Finally, this year my department will be asking for your comment on hunting related matters. The feedback we receive during this engagement will help us make decisions about providing the hunting opportunities Albertans want. This survey will be announced in the coming months.

I wish you all the best and a safe and successful hunting season.

Sincerely,

Jason Nixon  
Minister of Environment and Parks

## IMPORTANT CHANGES FOR 2021

### GENERAL

- In 2019 AEP amended the regulation to require mandatory reporting of harvest and effort on all special hunting licences purchased. For the 2020 hunting season, hunters were required to report their harvest and effort by March 15, 2021. If you did not complete your mandatory report, you will be subject to a \$15.00 survey fee that must be paid prior to purchasing your wildlife certificate and being eligible to participate in the Special Licence draw process.
- For the 2021 hunting season, holders of a Special Licence are required to report their harvest and effort by February 15, 2022 for all Special Licences they purchased. Failure to report will result in a \$15.00 survey fee being charged before they can purchase a Wildlife Certificate and participate in the Special Licence draw process.
- Wildlife Management Unit (WMU) 248 has been split into two separate WMUs; 247 and 248. Areas of Strathcona County and the County of Leduc will remain in WMU 248 and the areas, which are in County of Parkland and County of Sturgeon, which were in WMU 248, will now be in WMU 247.
- In an effort to appropriately manage group size and implement COVID-19 protocols, CFB Wainwright is restricting the number of individuals on base for the hunt. As a result, the 2021 hunting season for antlered and antlerless moose and either sex elk seasons are closed in WMU's 728/730 (CFB Wainwright). The CFB Wainwright deer season will proceed with reduced numbers of hunters drawn for each season. Additional information regarding check-in procedures and COVID-19 protocols will be emailed to hunters who are successfully drawn.

### BIG GAME

- The mountain goat hunting season has been temporarily closed and there will be no Special Licence draws for mountain goat in 2021.
- WMUs where the Supplemental White-tailed Deer Licence is now valid has changed for the 2021 hunting season with numerous additional WMUs. The Supplemental Antlerless White-tailed Deer Licence is issued with two tags. The FIRST tag issued with the licence (but NOT the second tag) is valid for tagging a deer hunted in one of the following WMUs: 346, 347, 349, 351, 354, 356-360, 521-523, 526, 527, 535 and 537. Both tags are valid for tagging a deer(s) hunted in any of the following WMUs: 200-208, 214-246, 250-260, 300, 302, 304, 305, 310-314, 320, 322, 332-337, 344, 348, 350, 352, 353, 355, 440-446, 500-520, 524, 525, 528-534, 536 and 539-544.
- The list of AEP Offices where bighorn sheep may be registered has changed for 2021. Compulsory registration of bighorn sheep may no longer be completed at the Hinton, Whitecourt, Slave Lake or Pincher Creek offices. For a complete listing of AEP Offices where compulsory registration of bighorn sheep may be completed please see page 13.

### Proposed Changes for 2022

- AEP is considering discontinuing WMU 300 Elk Special Licence (Draw Code 21) and combining these hunting seasons with Antlered Elk (Draw Code 18) and Antlerless Elk (Draw Code 19) Special Licence Draws. Individuals with current priority in the WMU 300 Elk Special Licence Draw will be allowed to transfer their priority to either Antlered or Antlerless Elk Special Licence Draw code should this change proceed in 2022. AEP will be consulting with stakeholders on this proposed change prior to making a decision on whether this change will proceed.
- AEP is considering eliminating the Cypress Hills archery licence which would allow holders of a elk (general) licence to hunt during the archery only elk season for WMUs 116, 118 and 119. AEP will be consulting with stakeholders on this proposed change prior to making a decision on whether this change will proceed.

## Accessing Agricultural Leased Land

**Before entering onto leased land, you must contact the leaseholder.**

Detailed maps, leaseholder contact information and access conditions for leased land are found on the Recreational Access Mapping Tool through the Environment and Parks website at: [recagpublicland.alberta.ca](http://recagpublicland.alberta.ca) or by calling 310-3773.

**Leaseholders may limit or deny access if:**

- You are not on foot
- Livestock are present in the field
- A crop has not yet been harvested
- You wish to discharge a firearm or use explosives near livestock
- A fire ban is in effect
- You wish to camp

**When on agricultural public land, be courteous and remember to:**

- Pack out litter and do not damage land or property
- Park vehicles so they do not block lease access
- Leave gates as they were found
- Ask leaseholder permission before lighting a fire

**Failing to follow these regulations can be costly, with a penalty of up to \$500.**

Alberta

## WMU DESCRIPTIONS

The WMU boundaries shown on the enclosed map are small-scale approximations of the actual units legally described in the *Wildlife Regulation* (AR 143/97) and subsequent amendments. The map enclosed in this Guide is provided to help you identify the WMU in which you wish to hunt. **It is your responsibility to know in which WMU you are hunting and the seasons, rules and regulations that govern hunting in that WMU.** Text descriptions of the WMU boundaries may be either read at your nearest Fish and Wildlife office or through the Alberta Queen's Printer website ([qp.alberta.ca](http://qp.alberta.ca)) or purchased from The Alberta Queen's Printer at the following address:

### Alberta Queen's Printer

10611 - 98 Avenue, Edmonton, AB T5K 2P7

Telephone: (780) 427-4952

**NOTE: Maps can be found online at [mywildalberta.ca/hunting/regulations/default.aspx](http://mywildalberta.ca/hunting/regulations/default.aspx).**

## MAPS

Maps providing information about access, topography and land ownership can be purchased at several locations throughout the province. Contact your local Map Dealer. Map Dealer locations are highlighted on the Map Distribution Centre external website at [aep.alberta.ca](http://aep.alberta.ca)

### Provincial and Federal Maps

Provincial and federal access and topographical maps are available from various private map dealers throughout the province.

### County and Other Municipal Maps

Hunters are reminded to check with county and municipal offices for detailed maps showing land ownership status. These maps are available for a nominal fee and are useful for determining land status and ownership, which can help you obtain permission for access.

## FEDERAL FIREARMS LEGISLATION

All hunters should be aware of federal laws surrounding the acquisition, possession, transportation and use of weapons and ammunition. For further information contact your local police service or the Canadian Firearms Centre at 1-800-731-4000 or visit the Centre's website at [rcmp-grc.gc.ca/cfp-pcaf/index-eng.htm](http://rcmp-grc.gc.ca/cfp-pcaf/index-eng.htm).

## DEFINITIONS

The following definitions will help you understand this Guide:

**Antlered** – a white-tailed deer, mule deer, moose or elk having an antler exceeding 10.2 cm (4 in.) in length.

**Antlerless** – a white-tailed deer, mule deer, moose or elk that is not “antlered” (as defined above).

**Bait** – any substance that consists of a food attractant, including any mineral and any representation of a food attractant.

**Big Game Designated Guide** – a person designated by the Alberta Professional Outfitters Society to commercially guide big game hunters in Alberta. A Designated Guide may guide not more than two Non-resident (Canadian) and non-resident alien big game hunters at a time in any part of Alberta, provided that each Non-resident (Canadian) or Non-resident alien has contracted the hunt through an Outfitter. The two-hunter limit does not include Resident hunters.

**Big Game Outfitter** – a person who is the holder of a valid Outfitter Permit, and who provides outfitting and guiding services to big game hunters in Alberta.

- Class S Outfitter – an Outfitter who holds Non-resident (Canadian)/Non-resident Alien allocations for Trophy Sheep Special Licences. A Class S Outfitter may also hold allocations for other big game special licences.
- Class T Outfitter – an Outfitter who holds allocations valid for Non-resident (Canadian) and Non-resident Alien big game special licences other than those for trophy sheep.

**Bird Game Designated Guide** – a person designated by the Alberta Professional Outfitters Society to commercially guide game bird hunters in Alberta.

**Bird Game Outfitter** – a person who is the holder of a valid Bird Game Outfitter-guide Permit issued by the Alberta Professional Outfitters Society and who provides outfitting and guiding services to non-resident and non-resident alien game bird hunters in Alberta.

**Either Sex Special Elk** – authorizes the hunting of any age, size, or gender of elk in a specific WMU.

**Green Area** – forest lands not available for agricultural development other than grazing. In general, the Green Area is public land outside the parkland and prairie regions or roughly in the northern half of the province and within a strip running along the Rocky Mountains and foothills.

**Hunter Host** – an adult resident who is the holder of a valid Hunter Host Licence. To obtain this licence, the adult must hold a valid WiN and be eligible to hold recreational hunting licences. A Hunter Host **may not provide services for gain or reward or accept a fee for services, directly or indirectly.**

The licence authorizes the holder (**usually a relative or friend of the hunters to be hosted**) to host a maximum of two non-residents (Canadian) or non-resident aliens\* named on the host's licence to hunt wolf, coyote and big game throughout the province. \* Non-resident alien hunters are referred to Outfitting and Guiding Requirements (page 18) for additional conditions and restrictions.

**Loaded Firearm** – A firearm in or on a vehicle, aircraft or boat is considered loaded if it has live ammunition in the breech, chamber or magazine. Cartridges are permitted in a magazine that is not attached to the firearm.

**Non-resident (Canadian)** – a person who is not a Resident, but who makes their home and is ordinarily present in Canada, and who has lived in Canada for the 12-month period immediately preceding the relevant date.

**Non-resident Alien** – a person who is neither a Resident nor a Non-resident.

**OHV (Off-Highway Vehicle)** – any motorized vehicle designed for cross-country travel on land, water, snow, ice, marsh or swamp land, or on other natural terrain. [Exceptions: motor boats, as well as four-wheel-drive vehicles and motorcycles registered in accordance with the *Traffic Safety Act*.] OHVs include the following kinds of vehicles when they are designed for cross-country travel as described above:

- four-wheel drive or low pressure tire vehicles,
- motorcycles and related two-wheel vehicles,
- amphibious machines,
- all-terrain vehicles,
- miniature motor vehicles,
- snow vehicles,
- minibikes, or

- any other means of transportation that is propelled by any power other than muscular power or wind.

**Partner Licence** – a licence issued to an eligible hunter that allows them to hunt a specific species in a specified WMU and season under the direct authority of a Special Licence held by another hunter successful in a draw.

**Resident** – a person who either

- has his or her only or primary residence in Alberta and
  - 1) is a Canadian citizen or is admitted to **permanent** residence in Canada, or
  - 2) has lived in Canada for the 12-month period immediately preceding the relevant date; or
- is on full-time service with the Armed Forces of Canada and would, if an election were held under the *Elections Act* (Canada), be eligible to vote in Alberta under that Act.

**Special Licence** – a licence obtained through a draw process, or for Resident, Non-resident and Non-resident Alien hunters, through an outfitter. It permits hunting of a specific type or class of game only in specific areas during a specified season (page 17).

**Weapon** – a firearm or any other device that propels a projectile by means of an explosion, spring, air, gas, string, wire or elastic material or any combination of those things.

**White Geese** – snow and Ross' geese.

**WMU** – Wildlife Management Unit, a geographical area prescribed in legislation.

**WiN** – Wildlife Identification Number, a permanent registration number issued to each hunter and angler.

### Month Abbreviations

The following defines the month abbreviations used in this guide:

A – August S – September O – October  
N – November D – December  
J – January F – February M – March  
Ap – April Ma – May Ju – June

## PURCHASING A LICENCE

Aspira manages the sale of all recreational hunting and fishing licences in Alberta. Licences are sold through private licence issuers or online at [Albertarelm.com](http://Albertarelm.com).

Albertarelm.com is a website for hunters and anglers. By registering on the site individuals can purchase their licences.

Costs of licences are the same online or at an issuer, no service fees are added. Cost will vary according to the type of licence.

### For Online Purchases:

To purchase an online licence you will need a valid credit card, an email address, access to a computer with an internet connection and a printer to print your licences.

Download the AlbertaRelm APP and easily store your licences and WiN card electronically. Please remember that the onus remains on the hunter to be able to produce their licence, whether electronic or paper, and associated paper tags when requested by an officer during field compliance checks.

To purchase a licence, which requires tags online, you must have a pre-numbered tag(s) before you begin your purchase process. Tags are available by calling 1-888-944-5494 and at Licence Issuers

### Licence Issuers

A list of Licence Issuers and locations can be located on [albertarelm.com](http://albertarelm.com) or contact the call centre/help desk toll-free in North America at 1-888-944-5494. Email inquiries can be sent to [ab.webmaster@aspirasupport.com](mailto:ab.webmaster@aspirasupport.com)

## LICENCE REQUIREMENTS

### Wildlife Identification Number (WiN)

Hunters and anglers in Alberta must have a 10-digit Wildlife Identification Number (WiN) to apply for draws, purchase wildlife certificates, licences and replacements. Please keep your information up to date; address changes can be made online or at an issuer.

### Wildlife Certificate

Hunters must possess a valid Wildlife Certificate and the applicable hunting licence to hunt big game or game birds. Licences whether electronic or paper and applicable tags must be carried on their person while hunting.

### Licensing requirements for first-time hunters

**NOTE:** All new first-time hunters who have qualified for obtaining recreational hunting licences by successfully completing the Alberta Conservation and Hunter education course, will be required to provide on their WiN profile, their hunter certificate number that is issued to each course graduate, in order to be eligible to purchase a hunting licence.

A first-time hunter is a hunter who 1) has not previously held a hunting licence in Alberta or elsewhere, or 2) has not prior to April 1, 2010, met Alberta first-time hunter criteria, or 3) has not successfully completed a hunter education course in Alberta or elsewhere.

**Non-resident and non-resident alien** hunters (12 years of age, 10 years of age for game bird, or older) are exempt from the first-time hunter eligibility requirement if they are accompanied by a Hunter Host or a Designated Guide while hunting in Alberta.

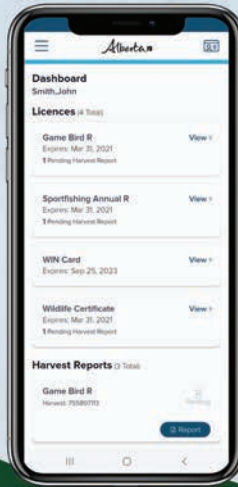

**Youth first-time hunters** must be *at least 12 years old* (10 years of age for game bird) to hunt under the authority of any hunting licence in Alberta. All hunters *under the age of 16 years* must have written permission from a parent or guardian to purchase hunting licences. Hunters who are *11 years old* may apply in the draws for licences if they meet the above criteria, but they must be 12 years old anytime before or during the open season for that draw. They may not hunt until they are *12 years old*. To hunt with a firearm, hunters *under 18 years of age* must be accompanied by a parent, a legal guardian or by a person 18 years of age or older who has the written permission of the parent or legal guardian. If a youth turns 18 during the hunting season, they can continue to hunt using their valid licence.

If you are interested in taking the Alberta Conservation and Hunter Education course, call the Alberta Hunter Education Instructors' Association toll-free in Alberta at 1-866-852-4342, Edmonton 780-466-6682, or Calgary 403-252-8474.

STAY CONNECTED  
**ON THE HUNT**

**Alberta**  
AlbertaRELM.com

Get the **AlbertaRELM** app to:

- Carry and reference your hunting and fishing licences.
- Easily access your virtual WiN card. Scannable at Issuer locations.
- Download and review regulations as PDFs to view online or offline on your device.
- Complete Harvest and Effort Reporting
- Order tags

If you forgot your WiN or need additional help, contact the RELM help desk at 1.888.944.5494. The onus is on hunters and anglers to be able to produce copies of their licences either electronically through the app or hard copy (paper) when requested by an officer during field compliance checks.

## Resident Youth Hunting Licences

Subject to the age limitations and conditions above, a resident 10 to 17 years of age may purchase a Resident Youth Wildlife Certificate, including a Game Bird Licence, for \$8.30. The holder of a valid Resident Youth Wildlife Certificate between 12 and 17 who has not yet attained the age of 18 years may also purchase a Youth White-tailed Deer Licence and a Youth Mule Deer Licence, each for \$8.25. **These licences are valid during the seasons that do not require one of the Special Licences obtained through a draw.** This person may also purchase an Antlerless Mule Deer Special Licence (available through a draw, see Draws for Special Licences, below) for \$8.25. Partner Licences are also available to resident youths if designated by the holder of any special licence. See this page.

## Resident Senior Hunting Licences

A resident 65 years of age or older, at the time of acquiring the following licences may purchase a Resident Youth/Senior Wildlife Certificate, including a Game Bird Licence, for \$8.30. The holder of a valid Resident Youth/Senior Wildlife Certificate may also purchase a Youth/Senior White-tailed Deer Licence for \$8.25. These licences are only valid during the seasons that do not require one of the special licences obtained through a draw. Partner Licences are also available to resident seniors if designated by the holder of any special licence.

## Hunters with Disabilities

Eligible individuals may obtain a special permit or licence relating to off-highway vehicle (OHV) use, discharging a weapon from an OHV and cross-bow use during archery-only seasons. Service improvements have been made for those medically certified with permanent injuries allowing renewal of all permits online at [albertarelm.com](http://albertarelm.com). Contact a Fish and Wildlife office (page 13) for more information or online at [mywildalberta.ca](http://mywildalberta.ca).

## Mandatory Suspended Hunter Requirements

A person whose right to hold a recreational hunting licence has been suspended in Alberta as a result of a conviction is required to complete the Alberta Conservation and Hunter Education course available at Alberta Hunter Education Instructors Association (AHEIA), either online or in person. This course must be taken after the beginning of the suspension period. The course is intended to increase outdoor safety, awareness, skills and efficiency and to develop responsible attitudes in the field. Individuals can contact AHEIA for information on completing the course. Participants will be responsible for course and material costs.

## Draws for Special Licences

When demand exceeds the number of hunting opportunities, season length and bag limits are often insufficient to conserve a game resource or to ensure a quality hunting experience. In such cases, Fish and Wildlife conducts lotteries or draws among eligible applicants for a limited number of special licences. Special licences allow successful applicants to hunt a specific type of game (e.g., antlerless elk) in defined areas during a specified season.

Only residents and, to a lesser extent, non-residents (Canadian) are eligible to apply in these draws. A non-refundable \$3.65 (plus GST) levy is charged for each application or group of applicants (maximum of four) for the same draw. This levy goes to the Alberta Conservation Association for programs. Although draws are used for specific wildlife management purposes (e.g., the goal in draw areas is to develop a more balanced age structure), other benefits include improved hunter success, increased opportunity to harvest a trophy animal, a more pleasant hunting experience with lower hunter densities, reduced disturbance of landowners, and a better distribution of the harvest.

**Draw Application Deadline Dates** — Hunters interested in special licence hunts for fall 2021 must have applied by June 24. Refer to the *2021 Alberta Hunting Draws* booklet for more information on draws.

Undersubscribed Licences are special licences leftover following the draw. These opportunities go on sale July 14 – visit [albertarelm.com](http://albertarelm.com) for more information.

**Draw Results** — Beginning July 14, draw results are available online at [albertarelm.com](http://albertarelm.com).

## Landowner Special Licence

A person who qualifies may be eligible to obtain a special licence after having been unsuccessful in some draws. Availability of Landowner Special Licences may be limited or not available at all for some species in certain WMUs. Those available will be issued to eligible persons on a first-come, first-served basis. For details on eligibility and the application process, please consult the *2021 Alberta Hunting Draws* booklet.

## Partner Licence

The following Partner Licences are available:

1. A resident holder of an **Antlerless Moose** Special Licence has the option of designating one eligible resident hunter (adult, youth or senior) to be a partner on the Special Licence, thereby allowing the designated hunter to obtain a Special Antlerless Moose Partner Licence.
2. A resident holder of an **Antlered Moose** Special Licence has the option of designating one eligible hunter, either a resident (adult, youth or senior) or a non-resident (Canadian) (adult, youth or senior), to be a partner on the Special Licence, thereby allowing the designated hunter to obtain a Special Antlered Moose Partner Licence. To qualify for a Partner Licence in a particular WMU, the non-resident (Canadian) must have been eligible to apply for the Special Licence in that WMU. A non-resident (Canadian) holder of an Antlered Moose Special Licence obtained through the draw process has the option of designating one eligible resident (adult, youth or senior) hunter to be a partner on the Special Licence, thereby allowing the designated hunter to obtain a Special Antlered Moose Partner Licence.
3. Resident hunters successful in drawing a Special Licence in any of the other Draws may designate one eligible resident youth (12 to 17 years of age) or senior (65 years of age and over) to be a partner on their Special Licence.

**Rules for all Partners** – A designated partner does not need any priority to qualify for a partner licence, does not need to have applied on the draw, and the purchase of the partner licence will not affect any existing priority of the partner. The intended partner must be eligible to hold a hunting licence. Refer to pages 19-23 regarding licence combinations and restrictions. The primary licensee may designate a partner at any time until the end of the season for which the Special Licence is valid. The designated partner hunts under the authority of the special licence and must be in direct communication (not including the use of any electronic devices) with the primary special licence holder while hunting to ensure that both stop hunting once the tag(s) are filled. The two hunters hunt as one.

The primary licensee must carry the tag(s) issued with the special licence and must tag the animal as soon as there is a kill. The primary licensee may hunt without the partner, but not vice versa.

**To Designate a Partner** – The Partner Licence is available online at [albertarelm.com](http://albertarelm.com) or at any licence issuer. The intended partner must provide the number of the Special Licence held by the primary hunter along with his or her own WiN. The Special Licence number authorizes the licensing system to issue a partner licence that is linked to the Special Licence. The intended partner may then purchase a Wildlife Certificate and the appropriate Partner Licence. If the intended partner is a non-resident, he/she must be accompanied by a licensed Hunter Host while hunting. The Partner Licence is valid for the same WMU and season as the Special Licence. No tag is issued with the Partner Licence.

## Outfitting and Guiding Requirements for Non-residents (Canadian) and Non-resident Aliens

There is no requirement for non-resident (Canadian) and non-resident alien game bird hunters to contract their **game bird** hunts through a Bird Game Outfitter. They may hunt game birds without an outfitter, a guide or Hunter Host. However, those who do choose to hire an outfitter for such a hunt must do so through the holder of a valid Bird Game Outfitter Permit and must purchase an \$8.25 Outfitted Game Bird Licence.

In this section, the term “accompany” or “accompanied” means that the persons involved are close enough to each other to easily facilitate verbal communications without the need for electronic devices. **It is acceptable, however, for the hunter to be placed in a stand location by the guide or hunter host, if they remain at that same location to be picked up later the same day.**

Non-resident (Canadian) and Non-resident Alien hunters of **big game, wolf and coyote must be accompanied by a licensed guide or a Hunter Host.** Each of these hunters has two options:

- 1) may contract the holder of a valid Big Game Outfitter Permit, be guided by a Big Game Designated Guide, and hunt under the authority of a licence allocated to an outfitter (for information on outfitters, contact the Alberta Professional Outfitters Society at [apos.ab.ca](http://apos.ab.ca)), **OR**
- 2) may be hosted by a Hunter Host (see this page) – usually a relative or friend – and hunt according to the following restrictions and conditions:
  - Non-resident Aliens may hunt with any Hunter Host only if the non-resident alien has not done so in the previous two (2) fiscal years (April 1 - March 31).
  - Non-residents (Canadian) and Non-resident Aliens are limited to certain licences, as indicated in the Licence Availability sections on pages 23 and 24.
  - Non-resident Aliens hosted by Hunter Hosts may hunt big game only during seasons that do not require one of the special licences, obtained through a draw, indicated by a ■ in the season tables on pages 45 to 56 or listed under Additional Special Licence Draw Hunts on page 58.

- A Non-resident Alien and their intended Hunter Host must apply for their licences and make a statutory declaration that they understand the terms and conditions of the licences (see Hunter Host Licence on this page). The application process can take up to 10 days to complete.
- A Non-resident Alien must not hunt bighorn sheep, cougar or trophy antelope while accompanied by a Hunter Host.
- **Further Restrictions for Non-resident Aliens Who are Not Relatives of the Hunter Host or the Hunter Host’s Spouse**
  - » Relatives are defined as father, brother, son, uncle, nephew, grandfather, grandson, son-in-law, brother-in-law (and female equivalents) of the Hunter Host or spouse of the Hunter Host.
  - » The Non-resident Alien and intended Hunter Host must initiate an application at a Fish and Wildlife office for their licences.
  - » The Non-resident Alien may apply to hunt only two (2) species of big game and wolf/coyote.

### A Hunter Host

- Must be an adult resident, and be eligible to hold recreational hunting licences.
- Must be the holder of a valid WiN and Hunter Host Licence (below).
- **may not provide services for gain or reward, or accept remuneration, directly or indirectly, for such services.**
- may host a maximum of two (2) hunters/year, either Non-residents (Canadian), Non-resident Aliens or a combination thereof. If hosting 2 Non-resident Aliens, at least 1 must be a relative.
- may host Non-resident Aliens only if the host has not hosted a Non-resident Alien in the previous two (2) fiscal years (April 1 to March 31).
- **must report to the Fish and Wildlife office by December 31 in the year of harvest all hunting activities by the Non-resident Aliens they hosted. A report must be submitted even if the hunter doesn’t harvest an animal.**
- must accompany the hunter(s) named on their Hunter Host Licence while they are hunting big game under the authority of the Hunter Host Licence.

### Hunter Host Licence

A resident who wishes to be a Hunter Host may purchase a Hunter Host Licence online at [albertarelm.com](http://albertarelm.com) or at any licence issuer. You must have the WiN(s) of the non-resident(s) at the time of purchase. You **must** ensure that the hunters you host are named on your Hunter Host Licence. If you purchase your Hunter Host Licence naming one hunter and you decide to add a second hunter to your licence at a later date, you can do so at no additional charge. Return to [albertarelm.com](http://albertarelm.com) or to a licence issuer to have your licence amended. Once you have purchased your Hunter Host Licence, the hunters may purchase their licences.

A Hunter Host who plans to take a **non-resident alien** hunting must do the following:

1. Contact a Fish and Wildlife office (see page 13) and initiate an application (including statutory declaration). Sign and have signature sworn.
2. Have the Non-resident Alien sign the application (including statutory declaration) and have their signature sworn. If the Non-resident Alien does not have a WiN, have them complete a WiN profile online at this time.
3. Take completed application to a Fish and Wildlife office. The application will be reviewed for final approval and keyed into the automated licensing system.
4. Once application is approved, go online at [albertarelm.com](http://albertarelm.com) or to any licence issuer and purchase your Hunter Host Licence and the appropriate Wildlife Certificate and licences.

# BIG GAME LICENCES

## Resident Licence Costs and Combinations

NOTE: The 5% federal Goods and Services Tax (GST) is not included in the costs listed below.

Prior to purchasing any licence, each hunter must possess a valid WiN (see page 15) and a Wildlife Certificate which costs \$28.22 (or \$8.30 for a Resident Youth/Senior Wildlife Certificate, page 17). Hunters wishing to hunt with a bow and arrow must also purchase a Bowhunting Permit (not required for hunting with a cross-bow).

Licence	Price (\$)	Restrictions Applying to the Species	Maximum Licences Allowed Per Hunter
White-tailed Deer	39.95	A Resident Adult may obtain only one of the first three licences.	A Resident Adult or Youth may obtain four different licences from this list of 29, but not more than one licence from this list for any one species.
Antlered White-tailed Deer Special Licence	39.95		
Outfitted Antlered White-tailed Deer Special Licence	262.24		
Youth/Senior White-tailed Deer	8.25		
Special Antlered White-tailed Deer Partner Licence (Youth/Senior)	12.00		
Mule Deer	39.95	A Resident Adult may obtain only one of the first three licences.	
Antlered Mule Deer Special Licence	39.95	A Resident Senior may obtain only one of the five licences, excluding the Youth licence.	
Outfitted Antlered Mule Deer Special Licence	187.24		
Youth Mule Deer	8.25		
Special Antlered Mule Deer Partner Licence (Youth/Senior)	12.00		
Elk	39.95	A Resident Adult may obtain only one of the first seven licences.	
WMU 300 Elk Special Licence	39.95		
Either Sex Elk Special Licence	39.95		
Cypress Hills Elk Archery <sup>1</sup>	39.95		
Antlerless Elk Special Licence	39.95		
Antlered Elk Special Licence	39.95	A Resident Youth/Senior may obtain only one of these 11 licences.	
Outfitted Antlered Elk Special Licence	309.66		
Special WMU 300 Elk Partner Licence (Youth/Senior)	12.00		
Special Either Sex Elk Partner Licence (Youth/Senior)	12.00		
Special Antlerless Elk Partner Licence (Youth/Senior)	12.00		
Special Antlered Elk Partner Licence (Youth/Senior)	12.00		
Moose (Archery)	44.95	A Resident Adult may obtain only one of the first seven licences.	
Antlerless Moose Special Licence	44.95		
Antlered Moose Special Licence	44.95	A Resident Youth/Senior may obtain only one of these eight licences.	
Outfitted Antlered Moose Special Licence	269.60		
Calf Moose Special Licence	44.95		
Special Antlered Moose Partner Licence	12.00		
Special Antlerless Moose Partner Licence	12.00		
Special Calf Moose Partner Licence (Youth/Senior)	12.00		
Trophy Sheep	59.95	A Resident who killed a sheep, except a legal non-trophy sheep, in 2020 may not purchase a Trophy Sheep Licence in 2021.	A Resident Adult may obtain only one of the first seven licences.
Outfitted Trophy Sheep	621.45		
WMU 408 Trophy Sheep Special Licence	59.95		A Resident Youth/Senior may obtain only one of these 12 licences.
WMU 410 Trophy Sheep Special Licence	59.95		
WMU 437 Trophy Sheep Special Licence	59.95		
WMU 438 Trophy Sheep Special Licence	59.95		
WMU 444/446 Trophy Sheep Special Licence	59.95		
			<i>continued on next page</i>

*continued on next page*

Licence	Price (\$)	Restrictions Applying to the Species	Maximum Licences Allowed Per Hunter
Special WMU 410 Trophy Sheep Partner Licence (Youth/Senior)	12.00	see page 19 for restrictions	see page 19 for licences
Special WMU 408 Trophy Sheep Partner Licence (Youth/Senior)	12.00		
Special WMU 437 Trophy Sheep Partner Licence (Youth/Senior)	12.00		
Special WMU 438 Trophy Sheep Partner Licence (Youth/Senior)	12.00		
Special WMU 444/446 Trophy Sheep Partner Licence (Youth/Senior)	12.00		
Non-trophy Sheep Special Licence	29.95	A Resident Youth/Senior may obtain only one of these two licences.	A Resident Adult may obtain one of each of these 22 licences (excluding the Youth/Senior licences).
Special Non-trophy Sheep Partner Licence (Youth/Senior)	12.00		
Antlerless White-tailed Deer Special Licence	18.70	A Resident Youth/Senior may obtain only one of these two licences.	A Resident Youth may obtain 16 different licences from this list of 22, but not more than one licence from this list for any one species.
Special Antlerless White-tailed Deer Partner Licence (Youth/Senior)	12.00		
Supplemental Antlerless White-tailed Deer <sup>2</sup>	19.15		
Strathcona White-tailed Deer	18.70		
Foothills Deer <sup>3</sup>	18.70		
Antlerless Mule Deer Special Licence	21.20	A Resident Youth may obtain only one of the last two licences.	
Antlerless Mule Deer Special Licence (Youth)	8.25		
Special Antlerless Mule Deer Partner Licence (Youth/Senior)	12.00		
Antlerless Deer (WMUs 212 & 248)	10.70		
Camp Wainwright Deer Special Licence	39.95	A Resident Youth/Senior may obtain only one of these two licences.	
Special Camp Wainwright Deer Partner Licence (Youth/Senior)	12.00		
WMU 212 Antlerless Elk Archery	18.95

WiN Activation	8.00		
Physical WiN Card	3.00		
Licence Reprint <sup>6</sup>	2.00		
Tag Replacement <sup>7</sup>	11.00		

- <sup>1</sup> This licence is only valid during the Cypress Hills Elk Archery Licence season, Sept. 1 - Oct. 15; WMU 116, 118 and 119.
- <sup>2</sup> The Supplemental Antlerless White-tailed Deer Licence is issued with two tags. The FIRST tag issued with the licence (but NOT the second tag) is valid for tagging a deer hunted in one of the following WMUs: 346, 347, 349, 351, 354, 356-360, 521-523, 526, 527, 535 and 537. Both tags are valid for tagging a deer(s) hunted in any of the following WMUs: 200-208, 214-246, 250-260, 300, 302, 304, 305, 310-314, 320, 322, 332-337, 344, 348, 350, 352, 353, 355, 440-446, 500-520, 524, 525, 528-534, 536 and 539-544..
- <sup>3</sup> When hunting under the authority of this licence, valid in WMU 212 only, hunters must carry written permission to hunt from a landowner involved.
- <sup>4</sup> This licence is only valid in the following WMUs where 2 black bear licences may be used: 224, 250, 258, 260, 320-360, 429, 445, 500-544 and 841.
- <sup>5</sup> Drawn applicants cannot reapply in future years (once-in-a-lifetime opportunity).
- <sup>6</sup> All purchased licences can be reprinted either at a licence issuer for a \$2.00 fee or online at no charge.
- <sup>7</sup> You are required to bring your licence and identification to a licence issuer and obtain the authorization for the tag replacement. \$11.00 fee is applicable per licence.

**NOTE: Special Licences (listed above) are available only through draws which occurred in June of this year.**

## Non-resident (Canadian) Licence Availability

All Non-resident hunters of big game, wolf or coyote require a Big Game Designated Guide or a Hunter Host. See Outfitting and Guiding Requirements on page 18.

**Non-residents who hunt with a Hunter Host** may obtain White-tailed Deer, Antlered Mule Deer, Antlered Moose, Antlered Elk, Black Bear, Supplemental Black Bear, Cougar, and Wolf/Coyote Licences (see table below) from private licence issuers or online at [albertarelm.com](http://albertarelm.com). Some special licences may be obtained through the draw system that are described in the *2021 Alberta Hunting Draws* booklet which was made available in June 2021.

**Non-residents contracting a hunt with a Big Game Outfitter** may obtain Special Licences by using an allocation, available from their outfitter. Wolf/Coyote licences can be purchased without an allocation. Non-residents using the services of an outfitter must be guided by a Big Game Designated Guide. These licences are only available at licence issuers.

## Non-resident (Canadian) Licence Costs and Combinations

NOTE: The 5% federal Goods and Services Tax (GST) is not included in the costs listed below. Prior to purchasing any licence, each hunter must possess a valid WiN (see page 15) and a Wildlife Certificate, which costs \$28.22. Hunters wishing to hunt with a bow and arrow must also purchase a Bowhunting Permit (not required for hunting with a cross-bow).

All **special** licences shown in the following table are available through a Big Game Outfitter. Some are also available through the draw system.

Licence	Price (\$)	Restrictions Applying to the Species	Maximum Licences Allowed Per Hunter
White-tailed Deer	132.24	A Non-resident may not obtain more than one of these two licences.	A Non-resident may obtain four different licences from this list of nine, but not more than one licence for any one species.
Antlered White-tailed Deer Special Licence <sup>1</sup>	132.24		
Antlered Mule Deer	132.24	A Non-resident may not obtain more than one of these two licences.	
Antlered Mule Deer Special Licence <sup>1</sup>	132.24		
Antlered Elk	154.66	A Non-resident may not obtain more than one of these two licences.	
Antlered Elk Special Licence <sup>1</sup>	154.66		
Antlered Moose (Archery)	164.60	A Non-resident may not obtain more than one of these three licences.	
Antlered Moose Special Licence <sup>1</sup>	164.60		
Special Antlered Moose Partner Licence	44.00		
Trophy Sheep Special Licence <sup>1,2</sup>	366.45	A Non-resident who killed a sheep in 2020 may not purchase a Trophy Sheep Special Licence in 2021.	A Non-resident may obtain one of each from this list of three.
Wolf/Coyote	12.40	See <i>2021 Alberta Guide to Hunting Regulations</i> for dates and restrictions.	
Trophy Antelope Special Licence <sup>3</sup>	213.10	None	
Black Bear Licence	83.90	A Non-resident accompanied by a Hunter Host may obtain both of these licences.	A Non-resident may obtain one of each licence from this list of two. However, Non-residents purchasing one of these two licences may not purchase a Black Bear Special Licence.
Supplemental Black Bear Licence <sup>4</sup>	83.90		
Black Bear Special Licence <sup>5</sup>	83.90	Non-residents must purchase these licences through an outfitter.	Non-residents purchasing this licence may not purchase a Black Bear Licence or a Supplemental Black Bear Licence.
Cougar	135.31	Not Applicable	One licence only from this list of two.
Cougar Special Licence	135.31		
Game Bird	65.51	Not Applicable	Not Applicable
Pheasant	32.91		
Bowhunting Permit (not required for cross-bows)	16.45		
WiN Activation	8.00		
Physical WiN Card	3.00		
Licence Reprint <sup>6</sup>	2.00		
Tag Replacement <sup>7</sup>	11.00		

see footnotes on next page

- <sup>1</sup> These licences are available through the draw system or through an outfitter. If purchased through an outfitter, an additional service fee and allocation and use fee will be charged. Please refer to the sections that deal with Non-resident (Canadian) Licence Availability (page 22) and Outfitting and Guiding Requirements (page 18).
- <sup>2</sup> Non-resident Trophy Sheep Special Licences are available through Class S Outfitters or through a draw. Only 2 licences are available through a draw, and each hunter successful in the draw must be accompanied by a Hunter Host.
- <sup>3</sup> Non-resident Trophy Antelope Special Licences are available through an outfitter or through a draw. Please refer to the sections that deal with Non-resident (Canadian) Licence Availability (page 22) and Outfitting and Guiding Requirements (page 18).
- <sup>4</sup> This licence is valid only in the following WMUs where 2 black bear licences may be used: 224, 250, 258, 260, 320-360, 429, 445, 500-544 and 841. Please see page 56 for more information.
- <sup>5</sup> These licences are valid for 2 black bears if the outfitter's allocation is valid for a WMU where the Supplemental Black Bear Licence is valid (i.e., 2-bear areas).
- <sup>6</sup> All purchased licences can be reprinted either at a licence issuer for a \$2.00 fee or online at no charge.
- <sup>7</sup> You are required to bring your licence and identification to a licence issuer and obtain the authorization for the tag replacement. \$11.00 fee is applicable per licence.

## Non-resident Alien Licence Availability

All Non-resident Alien hunters of big game, wolf or coyote require either a Big Game Designated Guide **or** a Hunter Host. See Outfitting and Guiding Requirements on page 18.

**Non-resident Aliens who hunt with a Hunter Host** may obtain Antlered White-tailed Deer, Antlered Mule Deer, Antlered Moose, Antlered Elk, Black Bear Special Licences and Wolf/Coyote Licences (see table below) online at [albertarelm.com](http://albertarelm.com) or at any licence issuers. See Outfitting and Guiding Requirements on page 18 for a summary of the circumstances under which these licences may be used and the limitations that apply.

**Non-resident Aliens contracting a hunt with a Big Game Outfitter** must obtain Special Licences by using an allocation, available from their outfitter. Wolf/Coyote licences can be purchased without an allocation. Non-resident Aliens using the services of an outfitter must be guided by a Big Game Designated Guide. These licences are only available at licence issuers.

## Non-resident Alien Licence Costs and Combinations

NOTE: The 5% federal Goods and Services Tax (GST) is not included in the costs listed below.

Prior to purchasing any licence, each hunter must possess a valid WiN (see page 15) and a Non-Resident Alien Wildlife Certificate, which costs \$68.22. Hunters wishing to hunt with a bow and arrow must also purchase a Bowhunting Permit (not required for hunting with a cross-bow).

Licence	Price (\$)	Restrictions Applying to the Species	Maximum Licences Allowed Per Hunter
Antlered White-tailed Deer Special Licence	203.84 <sup>1</sup>	None	A Non-resident Alien may obtain 1 of each licence from this list of 9.
Antlered Mule Deer Special Licence	203.84 <sup>1</sup>		
Antlered Elk Special Licence	291.43 <sup>1</sup>		
Antlered Moose Special Licence	310.30 <sup>1</sup>		
Black Bear Special Licence <sup>2</sup>	105.02 <sup>1</sup>		
Trophy Sheep Special Licence <sup>3</sup>	366.45 <sup>1</sup>	A Non-resident Alien who killed a sheep in 2020 may not purchase a Trophy Sheep Special Licence in 2021.	
Cougar Special Licence <sup>3</sup>	254.97 <sup>1</sup>	None	
Wolf/Coyote Licence	12.40 <sup>1</sup>	See page 58 for wolf and coyote season dates and restrictions.	
Trophy Antelope Special Licence <sup>3</sup>	253.02 <sup>1</sup>	None	
Game Bird	105.50	Not Applicable	Not Applicable
Pheasant	32.91		
Bowhunting Permit (not required for cross-bows)	23.20		
WiN Activation	8.00		
Physical WiN Card	3.00		
Licence Reprint <sup>4</sup>	2.00		
Tag Replacement <sup>5</sup>	11.00		

- <sup>1</sup> If purchased through an outfitter, an additional service fee and allocation and use fee will be charged.
- <sup>2</sup> This licence is valid for 2 black bears where the Resident and Non-resident (Canadian) Supplemental Black Bear Licences are valid (2-bear areas).
- <sup>3</sup> Trophy Sheep, Cougar and Trophy Antelope Special Licences are available to Non-resident Aliens only through an outfitter.
- <sup>4</sup> All purchased licences can be reprinted either at a licence issuer for a \$2.00 fee or online at no charge.
- <sup>5</sup> You are required to bring your licence and identification to a licence issuer and obtain the authorization for the tag replacement. \$11.00 fee is applicable per licence.

## GAME BIRD LICENCES

Resident game bird hunters require a WiN card and a Wildlife Certificate and:

- a Game Bird Licence to hunt grouse, partridge and ptarmigan;
  - a Game Bird Licence and a Pheasant Licence to hunt pheasant;
  - a Game Bird Licence and a Federal Migratory Game Bird Hunting Permit to hunt waterfowl;
  - a Wild Turkey Special Licence and a Game Bird Licence to hunt wild turkey.
- (NOTE: Wild Turkey Special Licences are available only through a draw. See page 61 for more information.)

Non-resident (Canadian) game bird hunters require a WiN card and a Wildlife Certificate and:

- a Game Bird Licence to hunt grouse, partridge and ptarmigan;
- a Game Bird Licence and a Pheasant Licence to hunt pheasant;
- a Game Bird Licence and a Federal Migratory Game Bird Hunting Permit to hunt waterfowl.

Non-resident Alien game bird hunters require a WiN card and a Non-Resident Alien Wildlife Certificate and:

- a Game Bird Licence to hunt grouse, partridge and ptarmigan;
- a Game Bird Licence and Pheasant Licence to hunt pheasant;
- a Game Bird Licence and a Federal Migratory Game Bird Hunting Permit to hunt waterfowl.

NOTE: The 5% federal Goods and Services Tax (GST) is not included in the costs listed below.

Prior to purchasing any licence, each hunter must possess a valid WiN (see page 15) and a Wildlife Certificate. The Wildlife Certificate costs \$28.22 or \$68.22 for a Non-Resident Alien Wildlife Certificate, or \$8.30 for a Resident Youth/Senior Wildlife Certificate (see page 17). Hunters wishing to hunt with a bow and arrow (but not a cross-bow) must also purchase a Bowhunting Permit.

### Licence Costs

Game Bird Licence	Price (\$)		
	Resident	Non-resident (Canadian)	Non-resident Alien
Game Bird	15.80	65.51	105.50
Pheasant	22.38	32.91	32.91
Wild Turkey Special Licence <sup>1,2</sup>	29.95	Not Applicable	Not Applicable
Special Wild Turkey Partner Licence (Youth/Senior) <sup>1</sup>	12.00	Not Applicable	Not Applicable
Bowhunting Permit	9.20	16.45	23.20
WiN Renewal	8.00	8.00	8.00
Licence Reprint <sup>4</sup>	2.00	2.00	2.00
Federal Migratory Game Bird Hunting Permit <sup>3</sup>	17.00	17.00	17.00

<sup>1</sup> A Resident youth or senior may obtain only 1 of these 2 licences.

<sup>2</sup> Available only through a draw, page 61.

<sup>3</sup> Available at Post Offices, certain private licence issuers or ordered online at [permis-permits.ec.gc.ca/](https://permis-permits.ec.gc.ca/).

<sup>4</sup> All purchased licences can be reprinted either at a licence issuer for a \$2.00 fee or online at no charge.

# 2020/21 ALBERTA HUNTING REPORT

## Where did your 2020/21 Hunting Licence Dollars go?

- Over \$19M in revenue was collected from the sale of hunting licences, hunting draw applications and WiN cards.
- Over 42% of hunting licence revenue goes directly to the Alberta Conservation Association levy in support of programming (For more information please visit [ab-conservation.com](http://ab-conservation.com)).
- Licence and administration fees accounted for just over 27% and provides compensation to licence issuers, pays for licensing services including the annual hunter harvest & effort survey delivered through AlbertaRelm.com
- \*The Alberta Professional Outfitter Society levies are applied to all outfitted licences.
- The Government of Alberta receives 31% of hunting licence revenue collected; 70% goes to General Revenue while 30% goes to a dedicated fund to deliver wildlife management programs such as annual ungulate surveys. For more information visit: [Alberta.ca](http://Alberta.ca) and search "wildlife survey".

For more information, visit  
[mywildalberta.ca/BuyLicences/Annual-Sales-Statistics](http://mywildalberta.ca/BuyLicences/Annual-Sales-Statistics)

## Resident Hunters in Alberta in 2020

- Over 142,883 resident hunters in Alberta.
- 17% purchased Bowhunting Permits.
- 55% purchased Game Bird Licences.

## Hunters in Alberta in 2020

- 147,996 total hunters hunted in Alberta.
- 5,045 Non-Residents
- 68 Non-Resident Aliens

## Hunter Hosts in Alberta in 2020

- Over 2,166 Albertans hosted over 4,705 friends and family to hunt with them in Alberta.
- Due to COVID-19 restrictions, there were minimal hunters from outside of Canada.

## Youth and Senior Hunters in Alberta in 2020

- Youth/Senior Wildlife Certificates are available for \$8.30 and include a Game Bird Licence. Over 10,600 Youth and 39,200 Senior Wildlife Certificates were sold.
- 7,300 Youth, and 11,200 Senior White-tailed deer licences and 420 Youth Mule Deer Special Licences were sold at a very reasonable fee of \$8.25.
- Did you know that you can legally share almost any big game Special Licence opportunity with a Youth or Senior hunter using the Partner Licence for only \$12.00. Almost 302 youth and 537 Senior hunters took advantage of this opportunity allowing them to hunt elk, moose, bighorn sheep, pronghorn antelope and wild turkey.

## 2020/21 ALBERTA HUNTING REPORT

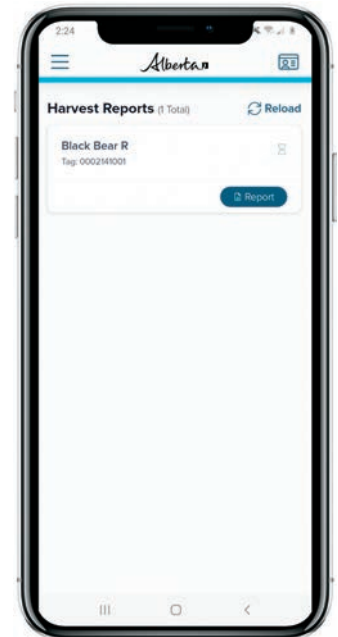

### Mandatory Harvest and Effort Reporting

It is now a condition of holding a special licence to report hunter harvest and effort. Visit [AlbertaRealm.com](http://AlbertaRealm.com) for more information on how convenient it is to report harvest and effort including the introduction of a new APP.

Harvest and effort information is essential to providing resource managers indicators of overall wildlife populations. Without this information, the department must rely on more intensive and costly wildlife surveys.

Hunters failing to submit harvest and effort survey results for 2021 will be subject to a \$15 Survey surcharge payable on their next wildlife certificate purchase.

### ENFORCEMENT UPDATE

Fish and Wildlife Officers help conserve and protect the province's wildlife by ensuring everyone understands and complies with the laws in Alberta. Hunters are reminded to ensure that they are familiar with the hunting regulations and season dates for the areas and species that they plan to hunt. In 2020, Enforcement Officers took over 2045 hunting related enforcement actions.

The top 5 offenses were:

1. Unlawful possession of wildlife
2. Hunt without a licence
3. Loaded firearm on vehicle/boat/aircraft
4. Hunt during a closed season
5. Failure to carry a licence while hunting

Source: Fish and Wildlife Enforcement Branch, Justice and Solicitor General.

Congratulations to the lucky hunter that has been awarded a free 2021 special licence just for completing their 2020 hunter harvest and effort survey!

Hunters will continue to be entered for a chance to win a special licence hunting opportunity for either a Moose, Mule Deer, Antelope or Elk for each harvest and effort survey completed.

Please visit [mywildalberta.ca](http://mywildalberta.ca) to see 2020 hunter harvest and effort survey results.

## Prohibitions

**Note:** *Convictions for certain offences will result in the suspension of all recreational hunting licences for a period of 1 to 3 years, and may result in a suspension for as long as 5 or more years. This is in addition to the assessment of a fine, an order and/or imprisonment.*

## General

It is unlawful to

- **apply on draws or obtain recreational licences in Alberta if:**
    - i) **your hunting privileges are under a licence suspension/cancellation in Alberta (or elsewhere) or**
    - ii) **if you fail to pay your fine after being convicted of a provincial hunting or provincial sportfishing offence.**
  - carry or use another person's licence or tag or allow another person to use your licence or tag.
  - fail to carry a hunting licence when the hunter is hunting under the authority of that licence or when the hunter is transporting game taken under it.
  - fail to produce a licence when requested to do so by a wildlife officer.
  - **\* For hunters that carry licences electronically (instead of paper), the AlbertaReIm APP is the only acceptable means of doing so. Tags cannot be carried electronically; they are a component part of many licences and must also be carried when required and produced to an officer upon request.**
2. harass, injure or kill any wildlife with a vehicle, aircraft or boat.
3. hunt any wildlife with or from an aircraft, or communicate, for the purpose of hunting, the signs or whereabouts of wildlife seen during a flight on an aircraft, including the use of unmanned aerial vehicles.
4. transport dead wildlife taken by others without an accompanying bill of lading (see page 64) signed by the licence or permit holder and providing the following details:
  - the kind and number of the licence under which the wildlife was killed or possessed,
  - a description of the wildlife,
  - the points of origin and destination, and
  - the date on which the wildlife is to be transported.
5. set out, use or employ any of the following items for the purpose of **hunting any wildlife:**
  - an arrow equipped with an explosive head,
  - a firearm that is capable of firing more than one bullet during one pressure of the trigger or a firearm that can be altered to operate as such,
  - a light,
  - a shotgun of a gauge greater than 10,
  - a device designed to deaden the sound of the report of a firearm,
  - recorded wildlife calls or sounds, or an electronically operated calling device except; 1) when hunting migratory game birds with the use of calls or sounds that mimic snow geese, or 2) using electronic calls to hunt crows, magpies, coyote, red fox and wolf (using sounds that mimic these animals, rabbits, hares, or rodents).
  - a pistol or revolver unless
    - the person is a licenced trapper (holding a federal authorization) who is dispatching an animal caught in a trap, or
    - it is an air powered pistol or revolver that discharges a projectile at less than 500 feet per second (often used for hunting small game).
  - live wildlife,
  - a swivel set or spring gun, or
  - a poisonous substance or an immobilizing drug.
6. abandon, destroy or allow flesh suitable for human consumption of any game bird or big game animal (except cougar or bear), to become unfit for human consumption.
7. have a loaded firearm (live ammunition in breech, chamber or

magazine) in or on, or discharge a **weapon** from

- a boat unless the boat is propelled by muscular power or is at anchor and the person is hunting, or
- any kind of aircraft or vehicle whether it is moving or stationary.

**Note:** Ammunition may be carried in a magazine that is not attached to the firearm. Refer to page 16 for contact information regarding federal firearms legislation.

8. discharge a **weapon** within 183 m (200 yards) or cause a projectile from a **weapon** to pass within 183 m (200 yards) of any occupied building. Owners, occupants, or persons authorized by the owner or occupant are excepted, subject to local bylaws.
9. discharge a firearm from or cause a projectile from a firearm to pass along or across:
  - a) a provincial highway (this designation applies to all former primary and secondary highways),
  - b) a road that is paved, oiled, graded or regularly maintained, unless
    - the road is held under any active disposition under the *Public Lands Act* or under an order under the *Surface Rights Act*, or
    - the person is hunting game birds with a shotgun under the authority of a licence.

**Note:** if there is no identifiable ditch or fence to mark the outside edge of the roadway, then the roadway extends 20 feet from the edge of the traveled portion.
10. hunt any wildlife while impaired by alcohol or drugs.
11. hunt any wildlife **or discharge a firearm** between one-half hour after sunset and one-half hour before sunrise.
12. alter, destroy or remove any sign or notice that has been posted under the authority of the *Wildlife Act*, *Petty Trespass Act* or the *Migratory Birds Regulations*.
13. hunt any wildlife or discharge any firearm on or over occupied land or enter on to such land for the purpose of doing so without the consent of the owner or occupant of the land (page 32). **NOTE:** There is an additional requirement affecting access for guided hunts (page 32).
14. possess a firearm of a calibre larger than .22 in a helicopter over WMUs 400-446.
15. hunt with a firearm if you are under **18** years of age and not accompanied by a parent, legal guardian or by a person 18 years of age or older who has the written permission of the parent or legal guardian. See page 16 for Canadian Firearms Centre contact information.
16. disturb traps, sets or trapping cabins.
17. feed black bears, grizzly bears, cougars, wolves and coyotes, unless while legally hunting where baiting is permitted.

## Big Game

It is unlawful to

1. hunt big game with any weapon other than:
  - a bow or cross-bow, and arrow or bolt, that are lawful for hunting big game (see page 42),
  - a rifle and ammunition that are lawful for hunting big game,
  - a muzzle-loading firearm .44 calibre or greater, or
  - a shotgun and ammunition that are lawful for hunting big game.
2. set out, use or employ any of the following items for the purpose of **hunting big game:**
  - ammunition of less than .23 calibre,
  - ammunition that contains non-expanding bullets,
  - an auto-loading firearm that has the capacity to hold more than 5 cartridges in the magazine,
  - a shotgun having a gauge of .410 or less,
  - a shotgun in a bird sanctuary,

- bait, except as permitted for the hunting of black bears (page 56),
  - a rifle or shotgun in WMUs 212, 247, 248 or 410 (persons hunting under the authority of a Strathcona White-tailed Deer Licence, a Foothills Deer Licence, or an Antlerless Moose Special Licence in Strathcona County may hunt with a bow and arrow, cross-bow, muzzle loader or shotgun),
  - a trap,
  - a cross-bow and arrow that is not authorized (see page 59).
3. discharge a **weapon** at a big game animal while it is swimming.
  4. discharge an arrow from a bow or cross-bow at big game, from, along or across a highway or road specified in Item 9 on page 28.
  5. be accompanied by a dog while hunting big game except;
    - in WMUs 400 – 446 where a pack dog may accompany a hunter if leashed, or within 50 m of the hunter and if under direct command and control. The dog is prohibited from tracking, scenting, pursuing or chasing big game, or
    - when hunting cougar under the authority of a cougar licence, from December 1 to the last day of March (the winter season).
  6. possess the carcass of a male elk, male antelope or male non-trophy sheep unless the complete skull plate, with horns or antlers intact, is also retained with the carcass until it is delivered to
    - the usual residence of the person who killed it, and the animal is butchered, cut and packaged for consumption, or
    - a premises in respect of which there is a Food Establishment Permit issued under the *Public Health Act* or a Licence for the Operation of an Abattoir issued under the *Meat Inspection Act*.
  7. possess the carcass of a calf moose taken under authority of a Calf Moose Special Licence unless its head is also retained with the carcass until it is delivered to
    - the usual residence of the person who killed it, and the animal is butchered, cut and packaged for consumption, or
    - a premises in respect of which there is a Food Establishment Permit issued under the *Public Health Act* or a Licence for the Operation of an Abattoir issued under the *Meat Inspection Act*.
  8. allow the skin of any bear or cougar to be wasted, destroyed, spoiled or abandoned. See exception for salvaging skin on page 32 – Access for Control of Livestock Predation.
  9. remove the distinctive evidence of sex and species from the carcass of any big game until
    - the carcass is delivered to a premises in respect of which there is a Food Establishment Permit issued under the *Public Health Act* or Licence for the Operation of an Abattoir issued under the *Meat Inspection Act*, or
    - the carcass is cut up and packaged for consumption at:
      - the usual residence of the person who killed the animal, or
      - the usual residence (a residence that is neither a business premises nor attached to such premises) of a resident of Alberta and that resident is in attendance.

In the case of cougar, the evidence of sex must remain attached and be retained until the animal has been registered (page 44).
  10. remove the tag from the carcass of a big game animal until authorized (as outlined on page 41).
  11. hunt:
    - a black bear under the age of one year,
    - a female black bear accompanied by a cub under the age of one year,
    - a female cougar accompanied by a kitten with spotted fur, or
    - a cougar kitten with spotted fur.
  12. transport big game hunters, except those requiring medical aid, or big game by helicopter over WMUs 400-446.
  13. land or take off in a fixed-wing aircraft that is carrying big game, big

game hunters or firearms of a calibre larger than .22 at or from any location in WMUs 400-446 except those locations where aircraft routinely land and take off.

14. hunt big game within 6 hours of having disembarked from an aircraft, except for a jet or turbo-propeller driven aircraft.
15. hunt big game on Sundays:
  - in WMUs 102 – 160,
  - in WMUs 624, 728, 730 and 936.
16. be within 50 yards of a vehicle when discharging a weapon at an antelope.

## Game Bird

It is unlawful to

1. possess, before it has been transported to the usual residence of the person who killed it or is prepared for immediate cooking, a game bird which does not bear evidence of sex and species. Evidence of sex and species consists of one completely feathered wing attached to the carcass of the game bird, except for wild turkey for which evidence of sex and species consists of the complete head and beard attached to the carcass (see page 61 for tagging instructions for wild turkey).
2. hunt a migratory game bird using:
  - a firearm loaded with a single bullet,
  - shot, other than non-toxic shot,
  - a cross-bow,
  - a shotgun that is of a larger size than 10 gauge.
3. hunt any game bird using:
  - a shotgun in which the magazine and chamber combined will hold more than three rounds of ammunition,
  - a trap, or
  - bait.

Note: see item 12 (below) for additional restrictions for hunting wild turkey.
4. have more than one shotgun, for personal use, at any time while hunting migratory game birds unless each shotgun, in excess of one, is unloaded and disassembled or unloaded and cased.
5. hunt game birds in WMU 410 with other than a bow and arrow or falconry bird.
6. hunt game birds in WMU 212, 247 or 248 with other than a bow and arrow, a cross-bow, shotgun or falconry bird.
7. exceed the daily or possession limit for any game bird (see game bird bag limits on page 60).
8. hunt game birds within 400 m (1/4 mi.) of a baited lure area operated under the Crop Damage Control Program.
9. transport migratory game birds belonging to others unless the carcasses are affixed with a tag showing:
  - the signature, name and address of the owner,
  - the licence number under which the bird was taken, and
  - the date the birds were taken.
10. fail to make every effort possible to immediately retrieve a migratory game bird that a person has killed or wounded. A hunter must have adequate means to retrieve any migratory bird that he or she may kill, cripple or injure.
11. hunt wild turkey using:
  - a weapon other than a shotgun, cross-bow or a bow and arrow,
  - a shotgun with a bore diameter smaller than 20 gauge, or
  - shot size smaller than No. 6 shot or larger than No. 2 shot.

12. remove the tag from a wild turkey until authorized (page 41).

13. to hunt or guide for migratory game birds within 48 hours of flying within the same WMU (excluding jet and turbo prop flights).

## EXPORTING

### Alberta Export Permit

All big game (including bison hunted under a Bison Special Licence), game birds, and furbearing animals require a provincial export permit (\$20.00 plus GST) when they are to be conveyed beyond the borders of Alberta, except under the following conditions:

1. Hunters who lawfully harvest game birds, coyotes, white-tailed deer, mule deer, moose, elk, pronghorn antelope or black bear\* under the authority of a hunting licence or a right that is protected under Canadian Constitution, may export those species without an Alberta export permit if
  - in the case of upland game birds, the bird has been processed as a mounted specimen, or
  - the shipment is accompanied by the hunter who killed the animal, and
  - the appropriate licence is carried by the hunter who killed the animal being exported.
- \* Alberta prohibits the export of gall bladder and paws of black bear. You may export red meat, hide with claws attached, head or skull with teeth attached, but no other parts. See CITES Export Permit at right.
2. Coyote that have been lawfully hunted by residents do not require a provincial export permit.

**Note:** United States migratory bird hunting regulations state that it is unlawful for a person to import into the United States migratory game birds belonging to another person. Evidence of sex and species must remain attached to the bird until the final U.S. destination is reached. For further information on the export of wildlife, contact a Fish and Wildlife office (page 13).

### Commercial Export of Wildlife to the U.S.

The United States Fish and Wildlife Service (US FWS) regulates commercial shipments of wildlife that enter or leave the U.S. In particular, taxidermists and outfitters may experience difficulties transporting wildlife to the U.S. unless such businesses are licenced with the US FWS for transporting commercial shipments of wildlife across the U.S. border. For more details, contact the US FWS at 1-703-358-1949 or view information at: [fws.gov/le/](http://fws.gov/le/)

### CITES Export Permit - for more information (1-800-668-6767)

Persons exporting cougar, wood bison or wolf to points outside Canada must obtain a federal export permit issued in accordance with the Convention on International Trade in Endangered Species of Wild Flora and Fauna (CITES). In addition, provincial export permits must be obtained for exporting these species, except for tanned wolf skin. All black bear require CITES export permits, except for those exported by United States hunters as noted on this page. Black bears do not require the provincial export permit if they are exported as described in the Alberta Export Permit section.

**U.S. Black Bear Hunters** – A CITES export permit is no longer required for U.S. hunters to take their black bear hunting trophy home in a fresh, frozen or salted condition at the conclusion of their hunt. The trophy must be part of the accompanying baggage of the hunter who killed the animal. This exemption does not apply to taxidermized trophies. All provincial export requirements still apply (see Alberta Export Permit section) and the trophy and documentation must be presented to Customs at the border when the hunters exit. Only the following parts of black bear may be exported: red meat, the hide with claws still attached, the head or skull with teeth attached, but no other parts. Alberta prohibits the export of the gall bladder or paws of black bear. Note that the CITES permit exemption for fresh black bear trophies applies only to U.S. hunters returning home and not to other hunters. An individual must not sell or dispose of the black bear within 90 days after the date on which the CITES exemption is claimed.

**Other circumstances for Black Bear:** Claws of black bear may not be exported from Alberta if they are separated from the whole skin. Partial skins of black bear that are processed (tanned or otherwise permanently preserved), black bear skulls with teeth attached (when not accompanied by the hunter returning home as described above) or taxidermized black bear skins may still be exported but only under a provincial export permit with a CITES permit. A black bear skin that is not part of a returning hunter's baggage may still be shipped but requires both provincial and CITES export permits.

## SALE OF WILDLIFE

The selling, buying, bartering, soliciting or trading in wildlife or wildlife parts, or offering to do so, is regulated under the *Wildlife Act* and Regulations. Many transactions are strictly prohibited, while others are regulated. For further information, contact a Fish and Wildlife office (page 13).

When conducting wildlife transactions over the internet, recognize that wildlife laws vary in many jurisdictions; wildlife (such as a naturally shed antler) that is legal to sell within Alberta may not be legal to sell to persons in the U.S.

## FOUND DEAD WILDLIFE

When driving or walking, hunters often find dead wildlife that they would like to keep. In most cases it is unlawful to possess such wildlife or parts of wildlife without first obtaining a permit. Contact a Fish and Wildlife office to apply for such a permit before taking possession of the wildlife.

# Chronic Wasting Disease Surveillance in Alberta

Since CWD surveillance began in 1998, the program evolved to have three primary objectives: detect CWD in wild cervids, limit CWD spread in wild cervids, and learn about CWD in Alberta landscapes and ecosystems. The surveillance data provide strong patterns to document how this prion disease builds in local deer populations and how it moves across the landscape. They also provide a strong foundation for game managers and stakeholders to consider the potential to change future patterns of CWD increase and spread.

Previous results and reports are on the CWD pages [www.alberta.ca/chronic-wasting-disease](http://www.alberta.ca/chronic-wasting-disease)

What follows is a brief overview of the surveillance program and current data.

Hunter harvest samples are the backbone of the wild CWD surveillance program. We also test opportunistic samples from ongoing Fish and Wildlife activities such as responding to found dead, road-kill, and emaciated cervids. Annual CWD data are on our web pages and are not repeated here.

However, patterns in the data are clear:

- Once CWD establishes in an area, overall prevalence (% infected) rises each year
- In general, CWD occurs throughout eastern Alberta south of the North Saskatchewan River and extends west of Hwy 2 in the southwest
- Most CWD occurs in mule deer, particularly bucks
- Prevalence differs among WMUs and changed significantly since 2010. Maps on the CWD web pages show prevalence in mule deer bucks in 2010 and 2019

**AB# 1504: Emaciated hunter-killed mule deer with CWD.**

In over 95,000 heads tested since 1998, we detected CWD in 3044 mule deer, 525 white-tails, three moose, and 13 elk. This includes 927 cases identified in 8905 heads tested in 2020 (10.4%): 755 mule deer, 167 white-tails, and five elk.

While the overall proportion of infected wild cervids remains low, prevalence of CWD in some mule deer populations is a significant concern to deer managers. Hunters and landowners also are concerned about seeing fewer deer, particularly male mule deer, in local areas of eastern Alberta. Deer infected with CWD die within two years. With prevalence over 50% in mule deer bucks in some local areas, it is not surprising that fewer older bucks are on the landscape.

Risk models using Alberta data reveal ongoing geographic spread, largely in relation to riparian areas and proximity to previous cases. CWD is now well-established in major watersheds throughout eastern Alberta and local pockets of infection are spreading out and coalescing across the landscape. Similarly, as CWD becomes more common, prevalence increases in mule deer females and spills over into more white-tails, elk, and a few moose.

What comes next? With CWD detected in the foothills, mule deer populations west of Hwy 2 seem to be at greatest risk of invasion with CWD. On the northern edge of the risk area, dense boreal forest may limit the rate of disease spread. If this is the case, it may also provide a buffer between caribou and CWD. However, CWD recently arrived at the northern forest fringe in Alberta and what comes next is unknown.

**% CWD in hunter surveillance since 1996/97**

Hunters, particularly those familiar with our earlier CWD surveillance program, are encouraged to take a close look at the program details for 2021. The modified approach taken by game managers in 2020 to better inform their deer management decisions is implemented again in 2021.

CWD surveillance is a robust and complicated program. Delivery of the program has many challenges. The majority of deer submitted for testing are harvested in November. We have procedures in place to test heads generally in the time frame they are submitted – that is, early November heads before mid Nov heads before late Nov heads. However, hunters generally submit ~2500 heads EACH WEEK in November, while it takes the lab a month to test ~2500 heads. All testing generally is completed in early March.

In Alberta, long-term surveillance improves our ability to track CWD occurrence and patterns. Armed with this information, big game managers can more fully understand the potential effects of the disease, and hunters concerned about CWD can make fully informed decisions about their hunt.

While there are a few cases of CWD in elk and moose, these are considered spillover from infected deer in the area. Thus deer remain the best surveillance sample to indicate CWD occurrence. However, as always, we will test the head of any cervid legally harvested in Alberta.

Ongoing support from the public, and hunters and outfitters in particular, is essential to CWD surveillance.

**Species-Sex Prevalence 2015-2020**

For more information on CWD surveillance in Alberta, **CHECK PAGE 3** of this guide.

# HUNTING PRIVILEGES ON OCCUPIED, PRIVATE AND PUBLIC LAND

## Access to Public and Private Lands

Except under authority of a Game Bird Shooting Ground Licence, it is unlawful to directly or indirectly buy or sell, trade or barter, or offer to buy or sell access to any land for the purpose of hunting any big game, furbearing animals or game birds.

Hunting on privately owned lands without permission is a problem in Alberta. It generates anti-hunting sentiment among landowners and results in the prosecution of more than 200 hunters each year. Hunters should leave gates as they find them, avoid damaging facilities or property, avoid disturbing livestock and establish friendly relations with landholders.

Although there is a moral obligation to pursue wounded game and a legal requirement to ensure game is retrieved and not wasted or abandoned, these obligations do not override the legal requirement to get permission to enter private land.

## Access to Public Lands

Hunters are reminded that the privilege to access public lands is contingent upon courtesy and responsible conduct. It is the hunter's responsibility to know, understand and abide by access conditions that apply when using and enjoying these areas.

In addition to privately owned land, permission is always required before entering or crossing:

- Indian reserves (from appropriate band council),
- Métis settlements (from appropriate Métis settlement association)
- Public land under agricultural or grazing lease (from leaseholder), please see page 16.

While recreational 'foot' access is generally accepted on public land, hunters should be aware that:

- Off-highway vehicle (OHV) access is prohibited in most provincial parks and provincial recreation areas.
- Off-highway vehicle access may be limited or prohibited within counties, municipal districts or within special public land management areas such as Public Land Use Zones (PLUZs).
- Some PLUZs have designated OHV trail networks (i.e. Ghost Pluz). In these areas, hunters are required to operate OHVs only on designated trails, even when retrieving game.
- Special conditions, such as extreme fire hazard, may warrant additional temporary access limitations.

Regardless of intent or mode of travel, all recreationists are expected and encouraged to respect, take pride, and play a stewardship role in maintaining the quality and character of Alberta's natural resources.

**For more information regarding access to Agricultural Leased Land and Provincial Grazing Reserves, refer to page 14.**

For more information, please contact your local Alberta Environment and Parks office by dialing 310-0000 or visit [aep.alberta.ca](http://aep.alberta.ca)

## Wildlife Act

Section 38 of the *Wildlife Act* specifies that no person shall hunt wildlife or discharge firearms on or over occupied lands, or enter onto such lands for the purpose of doing so without the consent of the owner or occupant.

The *Wildlife Act* defines "occupied lands" as follows:

- privately owned lands under cultivation or enclosed by a fence of any kind and not exceeding one section in area on which the owner or occupant actually resides, and
- any other privately owned land that is within 1.6 km (1 mi.) of the section referred to in clause (a) and that is owned or leased by the same owner or occupant.

The occupied lands described in the above legislation do not need to be posted with signs to receive protection under Section 38 of the *Wildlife Act*. The black area in the map (right) shows an example of nine square miles of land that could contain land falling within the definition of "occupied lands."

## Petty Trespass Act

Amendments to the *Petty Trespass Act* came into force June 1, 2004. While it is still possible for a landowner to prohibit entry on to his or her land by giving oral or written notice or by posting signs prohibiting entry, the amendments now set out certain kinds of property where entry is prohibited **without any notice required**. These lands include those privately owned lands (and leased public lands not associated with grazing or cultivation – these are addressed on page 14) that are under cultivation, fenced or enclosed by a natural boundary or enclosed in a manner that indicates the landholder's intention to keep people off the premises or animals on the premises. **Importantly, hunters or others who access those lands must have permission before entering.**

## Federal Criminal Code

The **Criminal Code** (Section 41) provides that a person in peaceable possession of real property can require a trespasser to vacate the property.

## Access for Guiding

A Hunter Host, Big Game Designated Guide or Bird Game Designated Guide, when guiding on any privately held land, requires permission authorizing access from the landholder for conducting those guiding services on that land. Such a guide or host is required to carry on his person the landholder's name, address (or legal land location of landholder's residence) and telephone number.

## Access for Control of Livestock Predation

### Black Bear and Coyote\*

Any person who is (a) the owner or occupant of privately owned land, or (b) authorized to keep livestock on public land, or (c) a resident authorized by a person described in (a) or a resident authorized in writing by a person described in (b) may, without a licence, hunt (but not trap) black bear or coyote on such lands, at all times of the year.

### Timber Wolf\*

Any person who is (a) the owner or occupant of privately owned land, or (b) authorized to keep livestock on public land, or (c) a resident authorized by a person described in (a) or a resident authorized in writing by a person described in (b) may, without a licence and at all times of the year, hunt (but not trap) timber wolf on such lands, and on any lands within 8 km (5 mi.) of the above lands, provided he or she also has the right of access to these latter lands.

### \*Cougar

Any person who is the owner or occupant of privately owned land may at any time of year, hunt (but not trap) cougar on such lands without a licence. Hunting with dogs is prohibited under this authority. Under this authority, registration is required within one week of the kill by bringing the skin and skull (or intact carcass) to a Fish and Wildlife office (see page 13). A premolar tooth will be retained for aging.

- \* It is not legally necessary to salvage pelts of furbearing animals (includes coyote and wolf) or black bear taken in accordance with regulations authorizing the control of problem wildlife set out in this part. The skin and skull of cougar taken on privately-owned land as described must be submitted at time of registration as noted, but the cougar pelt does not need to be further salvaged. Refer to page 58 for information about seasons for coyote and wolf.

# HUNTING IN ALBERTA PROVINCIAL PARKS AND PROTECTED AREAS

Alberta's Parks Division provides hunting opportunities on over 85% of the land base managed as a Provincial Park or Protected Area. In protected areas where hunting is allowed some activities are restricted in order to protect sensitive areas and species or to address public safety or wildlife management issues. Section 15 of the Provincial Parks (General) Regulation prohibits dogs off leash in Provincial Parks, Wildland Provincial Parks and Provincial Recreation Areas. Dogs need to be controlled via a restraining leash not greater than 2m long. For detailed information on hunting in Provincial Parks and protected areas contact your local Alberta Environment and Parks office or visit [albertaparks.ca](http://albertaparks.ca).

Classification of Protected Area	Hunting	Exceptions	OHV (including snowmobile) Use
Ecological Reserves	No	No	No
Wilderness Areas	No	No	No
Provincial Parks	No	Castle Provincial Park, Elk seasons in Cypress Hills	No
Provincial Recreation Areas (PRA)	No	Big game and game bird seasons in Blue Rapids, Cooking Lake-Blackfoot, Evan Thomas (Marmot Basin area), Fickle Lake, Lakeland, North Bruderheim, Redwater, Saskatoon Mountain, Sulphur Gates, and Wapiabi PRAs	Lakeland PRA - Yes on designated trails only.  North Bruderheim PRA
Wildland Parks	Yes	Bison hunting is not permitted in Wildland Parks outside the Bison Hunting Zone	On designated trails in a select number of Wildland Parks. For a complete listing visit <a href="http://albertaparks.ca">albertaparks.ca</a>
Willmore Wilderness Park	Yes	No	No
Heritage Rangelands	Yes	Entry is subject to grazing lease access conditions	Subject to grazing lease access conditions
Natural Areas	Yes	Access and other management conditions may apply. For a complete listing visit <a href="http://albertaparks.ca">albertaparks.ca</a>	Dependant on access conditions. For a complete listing visit <a href="http://albertaparks.ca">albertaparks.ca</a>

## Ecological Reserves

Ecological Reserves preserve and protect natural heritage in an undisturbed state for scientific research and education. The primary intent of this class of protected area is strict preservation of natural ecosystems, habitats, features and associated biodiversity. Hunting is prohibited in Ecological Reserves.

## Wilderness Areas

Wilderness Areas preserve and protect natural heritage, where visitors are provided with opportunities for non-consumptive, nature based outdoor recreation. Hunting is prohibited in Wilderness Areas.

## Provincial Parks and Recreation Areas

Provincial Parks preserve natural heritage; they support outdoor recreation, heritage tourism and natural heritage appreciation activities that depend upon and are compatible with environmental protection. Provincial Recreation Areas support outdoor recreation and tourism: they often provide access to lakes, rivers, reservoirs and adjacent crown land.

In general, hunting or discharging a firearm (or bow) is prohibited in Provincial Parks and Provincial Recreation Areas. Hunting is permitted in Castle Provincial Park and there are elk seasons in Cypress Hills Provincial Park. In addition, there are big game and game bird seasons in Blue Rapids, Fickle Lake, Wapiabi, Cooking Lake-Blackfoot, the northwest corner of Evan-Thomas, Sulphur Gates, and Lakeland Provincial Recreation Areas. Firearms discharge permits are required to hunt in all Provincial Parks and Provincial Recreation Areas other than Lakeland Provincial Recreation Area, Blue Rapids Provincial Recreation Area, Fickle Lake Provincial Recreation Area, and Wapiabi Provincial Recreation Area. Orientation sessions may also be required before hunting is permitted in a Provincial Park or Provincial Recreation Area. For more information on firearm discharge permits and orientation sessions for hunting in Provincial Parks or Provincial Recreation Areas please visit [albertaparks.ca](http://albertaparks.ca)

If not in the process of hunting in a Provincial Park or Provincial Recreation Area that has an open season, all firearms must be unloaded, encased or dismantled.

## Wildland Provincial Parks

Wildland Provincial Parks preserve and protect natural heritage and provide opportunities for backcountry recreation. Hunting is permitted in Wildland Provincial Parks. However, bison hunting in Wildland Provincial Parks is only permitted in the Hay-Zama Wildland Park, within the Bison Hunting Zone. Special access restrictions apply to all motorized vehicles.

## Willmore Wilderness Park

Willmore Wilderness Park was established under its own legislation in 1959 and is similar in intent to Wildland Parks. Hunting is permitted in Willmore Wilderness Park; however, off-highway vehicle (and snowmobile) use is not permitted. Hunters are advised that the adjacent staging areas have different hunting and firearm storage regulations than Willmore Wilderness Park. Further information and maps are available at the Hinton Parks Division office at 780-865-8395.

## Heritage Rangelands

Heritage Rangelands preserve and protect natural features that are representative of Alberta's prairies and grazing is used to maintain the grassland ecology. Two heritage rangelands have been established in Alberta - Black Creek Heritage Rangeland in the Whaleback area and OH Ranch Heritage Rangeland near Longview. These lands are cooperatively managed with Alberta Environment and Parks and grazing lease holders. Hunting is permitted, however entry is subject to grazing lease access conditions. For access conditions please visit [aep.alberta.ca](http://aep.alberta.ca), select Recreation and Public Use, then select Recreation on Agricultural Public Land.

## Natural Areas

Natural Areas preserve and protect sites of local significance and provide opportunities for recreation and nature appreciation activities. Hunting is permitted in Natural Areas, however, there are some sites with special management and safety considerations that restrict hunting and access, e.g. Wagner Natural Area, Riverlot 56, Sherwood Park Natural Area. For more information please visit [albertaparks.ca](http://albertaparks.ca). To find access conditions for Natural Areas that are subject to a grazing lease please visit [aep.alberta.ca](http://aep.alberta.ca). Go to Recreation and Public Use.

## Kananaskis Country

Kananaskis Country is a multi-use area comprised of both protected areas and public land; hunters must be aware of what type of land they are accessing. Access to some areas may be affected when roads and recreational trails are temporarily closed. Information and maps are available from Visitor Information Centres with in Kananaskis Country. For more information please visit [albertaparks.ca](http://albertaparks.ca).

## Hunters - Please be Aware:

### Baiting

Baiting of all wildlife, including bears, wolves and coyotes, is not permitted in all Provincial Parks, Provincial Recreation Areas and Wildland Provincial Parks. There are two exceptions: 1) A limited number of Registered Fur Management Area (RFMA) holders (registered trappers) and 2) A limited number of hunting guides who were historically authorized to conduct commercial guiding activities that used baits in an area prior to the area being established as a Wildland Provincial Park. Both exceptions are managed through permits and approvals issued by Alberta Environment and Parks. For more information contact your local Parks Division office.

## Found Dead Wildlife in Parks

In Provincial Parks, Wildland Provincial Parks and Provincial Recreation Areas it may be unlawful to remove dead wildlife that you find. For more information please contact your local Parks Division office. To obtain a permit to possess found dead wildlife, contact your local Fish and Wildlife office.

## Hanging and Storage of Big Game

Unless authorized by a Conservation Officer it is unlawful to dress, hang, or store big game in a Provincial Park or Provincial Recreation Area. Where these activities are permitted, please follow safe storage practices in order to prevent human-wildlife conflicts.

## Be Respectful of Others

Provincial Parks and protected areas are multiple use sites and are used by a wide range of recreational users year round. When hunting in these locations, respect other users and recognize that there may be hiking, cycling, camping, picnicking or other activities going on in close proximity. Please use caution when transporting firearms and avoid the use of firearms for target shooting and sighting-in of rifles.

**For more information on hunting in Provincial Parks and protected areas please visit [albertaparks.ca](http://albertaparks.ca) or contact your local Alberta Environment and Parks office.**

Edmonton: 780-427-3582

Northwest Region: 780-538-5350

Northeast Region: 780-623-5235

West Central Region: 780-960-8170

East Central Region: 403-340-7691

Kananaskis Country: 403-678-5508

South Region: 403-382-4097

## RESTRICTED AREAS

Alberta has a variety of restricted areas. Please read the following sections carefully to determine how the various designations affect hunting opportunities.

## ALL HUNTING

### Wildlife Sanctuaries

Sanctuaries are intended to provide secure habitat for wildlife and thus allow populations to either increase or remain at desired levels. They include areas of high quality habitat, often where populations of some wildlife species have been significantly lowered or dispersed because of disturbance at some time in the past. Sanctuary status allows these areas to realize their potential to support wildlife and to act as core areas of production for animals that will disperse to surrounding areas. It also increases the opportunities for Albertans to view wildlife.

**NOTE:** Privately owned lands within wildlife sanctuaries are excluded from the sanctuaries.

### Road Corridor Wildlife Sanctuaries

It is unlawful to hunt within 365 m (400 yards) of the centre-line of the road in a designated road corridor wildlife sanctuary (a corridor 730 m or 800 yards wide). No person shall possess a weapon in these sanctuaries unless the weapon, if it is a firearm, is unloaded **and** either dismantled, encased, or completely enclosed by another suitable covering. If crossing a road corridor wildlife sanctuary on horseback or on foot, a firearm must be unloaded and the person must be traveling in a direct route to leave the sanctuary.

There are 11 road corridor wildlife sanctuaries, shown in green on the enclosed WMU map. Eight are located in the Mountain and Foothills regions and three in the Boreal Region. Descriptions of the Road Corridor Wildlife Sanctuaries are as follows:

### Mountain and Foothills

1. Highwood – within 365 m (400 yards) of the centre-line of
  - (a) Highway 40 between the southern boundary of Peter Lougheed Provincial Park and Secondary Road 541,
  - (b) Secondary Road 541 between Highway 40 and the eastern boundary of the Rocky Mountain Forest Reserve;
2. Harold Creek – within 365 m (400 yards) of the centre-line of that portion of the road locally known as the Harold Creek Road between the eastern boundary of the Rocky Mountain Forest Reserve and Secondary Road 734;
3. Ya Ha Tinda – within 365 m (400 yards) of the centre-line of the road locally known as the Ya Ha Tinda Ranch Road between the Red Deer River Provincial Recreation Area and the Ya Ha Tinda Ranch headquarters building;
4. Forestry Trunk Road – within 365 m (400 yards) of the centre-line of Provincial Highway 734 between its intersection with the road locally known as the Lynx Creek Road in section 26, township 36, range 14, west of the 5th meridian and the Seven Mile Provincial Recreation Area;
5. Cutoff Creek – within 365 m (400 yards) of the centre-line of the road locally known as the Cutoff Creek Road between Provincial Highway 734 and the Cutoff Creek Equestrian Staging Forest Recreation Area;
6. North Ram – within 365 m (400 yards) of the centre-line of that portion of Secondary Road 734 that is in Township 38, Range 15, West of the 5th Meridian and north of the North Ram River;
7. Onion Creek Road – within 365 m (400 yards) of the centre-line of the road locally known as the Onion Creek Road in section 9, township 36, range 14, west of the 5th meridian to its intersection with Provincial Highway 734;
8. Kootenay Plains – within 365 m (400 yards) of the centre-line of that portion of Highway 11 between Allstones Creek and the eastern boundary of Banff National Park;

## Hunting is prohibited in national parks in Alberta, which include:

Banff — Waterton Lakes — Elk Island — Wood Buffalo\* — Jasper

### Close to the national park boundary?

It is your responsibility to know where you are in relation to the park boundaries. Not all areas are clearly marked. Unsure? Obtain appropriate maps from your nearest outdoor store or contact the national park closest to your planned hunting area.

#### It is illegal to:

- Possess a firearm within a national park, except in a vehicle on a through highway, or at a person's primary residence, where it must be unloaded and encased.
- Disturb, chase or entice wildlife to move outside national park boundaries.
- Take "shortcuts" through national park land while in possession of a firearm.
- Enter a national park while in the act of hunting, trapping, pursuing or searching for wildlife to hunt, even without a firearm.
- Remove or possess natural objects (e.g. antlers or skulls).

If you wound an animal and it enters a national park, DO NOT ENTER THE PARK. Contact Parks Canada immediately.

### To report incidents, wounded animals or for more information:

**Banff and Waterton Lakes:** 1-888-927-3367

**Elk Island and Jasper:** 1-877-852-3100

**Wood Buffalo:** 1-867-872-0404

\*This notice does not apply to Indigenous Rights' holders who are eligible to hunt and harvest in Wood Buffalo National Park. For more information, please contact 1-867-872-7900.

## La chasse est interdite dans les parcs nationaux de l'Alberta, ce qui inclut les parcs nationaux suivants :

Banff — Lacs-Waterton — Elk Island — Wood Buffalo\* — Jasper

### Et à proximité de la limite d'un parc national?

Vous avez la responsabilité de vous informer à quel endroit se trouvent les limites du parc national. Toutes les limites ne sont pas clairement indiquées. Vous avez un doute? Obtenez les cartes appropriées auprès de votre magasin de plein air le plus près ou communiquez avec le parc national se trouvant à proximité de la zone où vous prévoyez de chasser.

#### Il est illégal :

- De se trouver en possession d'une arme à feu dans un parc national, sauf si elle se trouve dans un véhicule circulant sur une route de transit, ou dans la résidence principale d'une personne, où elle doit être déchargée et rangée dans un étui.
- De perturber, de pourchasser ou d'attirer un animal sauvage à l'extérieur des limites d'un parc national.
- De prendre des « raccourcis » à l'intérieur des limites d'un parc national tout en étant en possession d'une arme à feu.
- D'entrer dans un parc national pendant la pratique d'une activité de chasse, de piégeage, de poursuite ou de recherche d'animaux sauvages aux fins de la chasse, même sans arme à feu.
- D'enlever des objets naturels ou être en possession de tels objets (p. ex. bois de cervidés ou crânes).

Si vous blessez un animal et qu'il entre dans un parc national, N'ENTREZ PAS DANS LE PARC. Communiquez avec Parcs Canada immédiatement.

9. Nordegg – within 365 m (400 yards) of the centre-line of Provincial Road 734 where it intersects the North Saskatchewan River in section 34, township 39, range 15, west of the 5th meridian to where it crosses Shunda Creek and within 365 m (400 yards) of the centre-line of Provincial Highway 11 from where it intersects Provincial Highway 734 to where it crosses Shunda Creek;
10. Highway 40/Little Smoky/Simonette – within 365 m (400 yards) of the centre-line of that portion of Highway 40 between the Berland River and the Muskeg River.
11. Highway 40 Cadomin - within 1 kilometre (1094 yards)
  - (a) west of the centre-line of Provincial Highway 40 between the intersection of Provincial Highway 40 and the northern boundary of the southwest quarter of section 8, township 48, range 24, west of the 5th meridian at its northerly extent and the intersection of Provincial Highway 40 and the northern boundary of section 5, township 48, range 24, west of the 5th meridian, and
  - (b) of the centre-line of Provincial Highway 40 between the intersection of Provincial Highway 40 and the northern boundary of section 5, township 48, range 24, west of the 5th meridian at its northerly extent and the intersection of Provincial Highway 40 and the eastern boundary of section 24, township 47, range 24, west of the 5th meridian at its southeasterly extent.

### Boreal Region

12. Whitemud Hills – within 365 m (400 yards) of the centre-line of the Peace River Pulp Road locally known as the Whitemud Hills Haul Road from Highway 35 to the western boundary of Section 14, Township 85, Range 2, West of the 6th Meridian;
13. Sulphur Lake – within 365 m (400 yards) of the centre-line of the Peace River Pulp Road locally known as the Sulphur Lake Haul Road from the southeast corner of Township 88, Range 1, West of

- the 6th Meridian to its junction with the road locally known as the Canfor East Road in Township 89, Range 3, West of the 6th Meridian;
14. Peace River Pulp Mill – within 365 m (400 yards) of the centre-line of the road locally known as the Peace River Pulp Resource Road from its intersection with secondary road 986 in the south-east quarter of section 17, township 85, range 19, west of the 5th meridian northerly to the centre of the north-east quarter of section 23, township 90, range 20, west of the 5th meridian (gate at Whiskey Jack Creek).

### Seasonal Sanctuaries

No person shall approach within 800 metres (0.5 mile) of any of the following seasonal sanctuaries between April 15 and September 15.

1. The island known as Pelican Island in Newell Lake in Township 17, Range 15, W4M;
2. The unnamed island in Namur Lake in Sections 35 and 36, Township 97, Range 17, W4M;
3. The unnamed island in Beaverhill Lake in Section 5, Township 52, Range 17, W4M;
4. The unnamed island in the unnamed lake in Section 8, 9, 16 and 17, Township 95, Range 17, W4M;
5. The unnamed island in Scope Reservoir in LSD 2 and 3, Section 10, Township 13, Range 14, W4M.

No person shall enter the following seasonal sanctuaries between April 15 and September 15:

1. That portion of the unnamed island in Lower Therien Lake in the NW Quarter of Section 14, Township 57, Range 10, W4M;
2. That portion of Lower Therien Lake in Section 2, 3, 10 and 11, Township 57, Range 10, W4M;
3. The unnamed islands in the Slave River in the SW Quarter of Section 30, Township 126, Range 10, W4M, and the SE Quarter of Section 25, Township 126, Range 11, W4M;
4. The island known as Bird Island in Buffalo Lake in Section 30, Township 40, Range 20, W4M;
5. The unnamed island in Joseph Lake in Section 12, Township 50, Range 22, W4M.

No person shall enter the following seasonal sanctuaries between May 1 and August 15:

1. The following lands to the extent that, at any given time, they are not covered by any of the waters of Muriel Lake,
  - a) within township 59, range 5, west of the fourth meridian, the east half of legal subdivisions 9 and 16 of section 19; legal subdivisions 12, 13, 14, 15 and 16 of section 20; legal subdivisions 13 and 14 of section 21; the northeast quarter of section 21; legal subdivisions 2, 3 and 4 of section 28; legal subdivisions 10 and 11 of section 29; the southeast quarter and the southwest quarter of section 29;
  - b) within township 60, range 5, west of the fourth meridian, legal subdivisions 5, 11, 12, 13 and 14 of section 1; legal subdivisions 8, 9, 15 and 16 of section 2; the southeast quarter and the northeast quarter of section 11; legal subdivisions 3 and 4 of section 12.
2. All areas within legal subdivisions 10, 11, 12, 13, 14 and 15 of section 35, township 68, range 15, west of the fourth meridian and legal subdivisions 9 and 16 of section 34, township 68, range 15, west of the fourth meridian.

### Métis Settlements

In general, only a member of a Métis Settlement Association, formed under the *Métis Settlements Act*, may hunt or trap wildlife on a Métis Settlement. Hunting by non-members may be authorized under settlement by-laws.

### Forest Recreation Areas

It is unlawful to discharge a firearm within a forest recreation area. It is also unlawful to “dress” a big game animal within a forest recreation area.

## National Parks

Hunting is prohibited in national parks, and hunters should be especially careful about their locations when hunting near park boundaries. Firearms are prohibited in national parks except on through highways and in town sites where they must be unloaded and encased.

## Other Restricted Areas

Except for the special seasons provided in WMUs 728, 730 and 732, hunting is not permitted in the following areas:

- Cold Lake Air Weapons Range (WMU 726),
- Canadian Forces Base Wainwright (WMUs 728 and 730),
- Canadian Forces Base Suffield (WMU 732),
- Ghost River Wilderness Area (WMU 734),
- Greene Valley Wildlife Management Unit (WMU 926),
- Siffleur Wilderness Area (WMU 736),
- White Goat Wilderness Area (WMU 738), and
- within 91 m (100 yards) of Highway 1 or Highway 1A in WMU 410.

## BIG GAME HUNTING

The hunting of big game is not permitted in the following areas:

- the Gregg River Resources Coal Mineral Surface Lease in WMU 438, and
- the Cardinal River Coal Mineral Surface Lease in WMU 438.

## Saskatoon Mountain Primitive Weapons Area

Only shotguns, muzzle loaders and archery equipment may be used to hunt big game in this area in WMU 357, located 20 km west of Grande Prairie on the north side of Highway 43 (see enclosed Wildlife Management Unit Map). For a more detailed map/description of area, please contact the Grande Prairie Fish and Wildlife office.

## Restricted Areas for Trophy and Non-trophy Sheep

It is unlawful to hunt trophy or non-trophy sheep within the following areas:

- 0.8 km (0.5 mi.) of Highway 1A between the western boundary of the Stoney Indian Reserve and Canmore,
- 0.8 km (0.5 mi.) of Highway 3,
- 1.6 km (1 mi.) of the Sheep River from the eastern boundary of WMU 406 upstream to Dyson Creek,
- 1.6 km (1.0 mi.) of the Inland Cement Rock Quarry near Cadomin,
- 1.6 km (1.0 mi.) of the intersection of Whitehorse Creek and the main forestry trunk road south of Cadomin,
- 1.6 km (1.0 mi.) of where Highway 16 intersects the eastern boundary of Jasper National Park,
- 3.2 km (2.0 mi.) of the intersection of the Forestry Trunk Road and the South Ram River in Section 18, Township 36, Range 13, West of the Fifth Meridian.

## GAME BIRD HUNTING

### Game Bird Sanctuaries

Hunting game birds and carrying shotguns are prohibited in game bird sanctuaries except with a special permit. Descriptions of these sanctuaries are available from the Alberta Queen's Printer in Edmonton (page 12).

Game bird sanctuaries are located in the following WMUs:

WMU	Sanctuary	WMU	Sanctuary
102	Pakowki Lake	242	Miquelon Lake
148	Many Island Lake	357	Saskatoon Lake*
212	Inglewood*	503	Lac La Biche
220	Red Deer*	530	Richardson Lake*
238	Birch Lake	523	Kimiwan Lake
242	Ministik Lake		

\*These areas are designated as a Federal Migratory Bird Sanctuary.

# VEHICLE RESTRICTIONS

The use of vehicles, including off-highway vehicles (OHVs), is controlled by various regulations. Refer to the enclosed Wildlife Management Unit Map for more information.

## Vehicle Use and Restrictions

The 'footprint' of vehicles is much greater than the average foot. Noise, erosion, soil compaction, habitat disturbance and vegetation impacts generally increase with vehicle use. Hunters are requested to minimize the impacts of vehicles where they are permitted and abide by limitations to vehicle use where applicable.

All off-highway vehicles (OHVs) operated on public land must be registered, insured and have a visible licence plate. Vehicles must also have a headlight, tail light, muffler and spark arrestor.

## Public Land Use Zones (PLUZ)

Several areas in the province are designated as PLUZs to allow for the management of recreational interests and pressures on local ecology. On and off highway vehicle restrictions apply in all PLUZs and may limit vehicle type, trail access and seasons open to vehicle use. WMU and PLUZ boundaries may overlap and all – or portions of – WMUs may have vehicle access restrictions. Please refer to PLUZ maps available at your local Alberta Environment and Parks office or visit [aep.alberta.ca](http://aep.alberta.ca), see Recreation and Public Use Section.

## Wildland Provincial Parks

Hunting is allowed in the Wildland Provincial Parks shown on the enclosed WMU map. However, special access restrictions apply to all motorized vehicles. For example, Bob Creek Wildland Provincial Park provides a network of designated trails on which only specific OHVs (quads and snowmobiles) may be operated from May 1 to December 15. For more detailed information, contact Alberta Environment and Parks or visit [albertaparks.ca/](http://albertaparks.ca/)

## Hunting with Motorized Vehicles

It is unlawful to

- discharge a **weapon** at antelope from within 46 m (50 yards) of a vehicle;
- use motorized travel within Willmore Wilderness Park; and
- carry a weapon (see definition on page 14) on an OHV **between 1 hour before sunrise and the following noon** during an open season for big game\* on public land in the following WMUs: 400-446. This does not apply to a person who is traveling on a direct route to or from a location accessible by vehicles designed for highway travel and his or her isolated campsite, and the weapons and ammunition are carried out of view in separate locked containers (and remain locked during the trip).

Also, the restriction does not apply in a WMU when the only big game season open is a spring black bear season or a cougar season.

\* this restriction applies to all hunters (including bird game hunters).

Public Land Use Zone (PLUZ)	Off-Highway Vehicles	Associated WMUs
Allison Chinook	Seasonal access on designated trails only	402
Athabasca Ranch	Seasonal access only	344
Brule Lake	Designated corridors only	438

Whitcourt Sandhills X-Country Ski	NOT PERMITTED	507

## Use of Aircraft

The use of aircraft for the purpose of hunting and hunting after flight is controlled by various regulations which are summarized under the "general" and "big game" prohibitions area within this Guide. For further clarity, it is unlawful to:

1. Use any aircraft for the purpose of hunting wildlife, including unmanned aerial vehicles.

**"Canada's Best Service & Prices"**

2. Hunt big game within 6 hours\* of having disembarked from an aircraft, except for a jet or turbo-propeller driven aircraft (regardless of the purpose of the flight).
3. Communicate, for the purpose of hunting, the whereabouts or signs of wildlife from knowledge gained from a manned or unmanned aircraft flight to anyone at any time during or after the flight.
4. To hunt, guide or outfit for migratory game birds within 48 hours of flying within the same WMU (excluding jet and turbo prop flights).

\*NOTE: Hunting big game after the 6 hour timeframe as indicated in #2 above does not negate the potential application of #1 above.

### Recreation Trails

A number of forested areas throughout Alberta have designated recreation trails. These areas allow a variety of activities, including hiking, horseback riding, cross-country skiing and snowmobiling. Trail users and backcountry travellers should be aware of current land use restrictions. For more information on recreation trails, contact the Information Centre in Edmonton (see page 13).

**When accessing Alberta's public land whether motorized or non-motorized, hunters are reminded to respect the land.**

### Trappers' Trails

Many trails on Crown lands are created and maintained by trappers. To avoid interference with trapline operations, recreationists are urged to avoid motorized use of trails marked with signs indicating "Active Trapline," especially during trapping seasons of November through February.

## DOES YOUR RANGE?

# BIG GAME REGULATIONS

## — Big Game Identification —

**Trophy Sheep** — A male bighorn sheep with horns, one of which is of sufficient size that a straight line drawn from the most anterior point of the visible base of the horn to the tip of the horn extends beyond the anterior edge of the eye when viewed in profile.

**Full-Curl Trophy Sheep** — A male bighorn sheep with horns, one of which is of sufficient size that when viewed in profile, its tip extends upward beyond a straight line drawn from the rear-most point of the base of the horn to the centre of the nostril.

**Be Careful!** Study a ram carefully when determining its trophy status. Be sure to view the ram's head from a horizontal plane and in profile, with the front of the right and left horn bases aligned. Views from below, in front, or any other perspective other than "in profile" will not provide for accurate judgement. Some rams may not be legal even if they are old or have horns severely broomed or with turned up tips.

lamb

yearling ewe

**Non-trophy Sheep** — A female bighorn sheep or a male bighorn sheep under one year of age.

yearling ram  
(illegal)

adult ewe

**White-tailed Deer** — Body color grey to reddish brown, under body white. Tail large and bushy, brown on upper surface and white on lower surface. Tail often held erect and "flagged" when animal runs. Gait a series of short running dashes and bounds. Antlers have individual tines off main beams. Antlers present on males only.

**Mule Deer** — Body color grey to brownish grey, under body white. Ears prominent; tail compact, rope-like, and black-tipped; rump patch white. Tail held down when animal runs. Gait a series of stiff-legged bounds. Antlers branched and present on males only.

### Antlered

A white-tailed deer, mule deer, moose or elk having an antler exceeding 10.2 cm (4 in.) in length.

### Antlerless

A white-tailed deer, mule deer, moose or elk that is not "antlered" (as defined above).

**Trophy Antelope** — A male pronghorn antelope that has a horn at least 12.6 cm (5 in.) in length.

**Non-trophy Antelope** — A female pronghorn antelope or a male pronghorn antelope having horns not more than 7.6 cm (3 in.) in length.

**Woodland Caribou** — Woodland Caribou are classified as Threatened animals in Alberta.

male

**THERE IS NO OPEN SEASON FOR CARIBOU.**

female

**Six-point Elk** — A male elk bearing an antler that is composed of a main beam from which project not fewer than five tines, each of which is at least 7.6 cm (3 in.) in length.

**Note:** The tip of the main beam must be at least 7.6 cm (3 in.) from the base of the last tine counted.

**Three-point Elk** — A male elk bearing an antler that is composed of a main beam from which project not fewer than two tines, each of which is at least 7.6 cm (3 in.) in length.

**Note:** The tip of the main beam must be at least 7.6 cm (3 in.) from the base of the last tine counted.

Go to [bearsmart.alberta.ca](http://bearsmart.alberta.ca) for more information on distinguishing black bears from grizzly bears.

## Moose

**Cow** – large, long nose and face; eyes appear close to top of head; rectangular body proportions; 1.8 m (6 ft.) high at the shoulder; may be found alone.

**Calf** – small, short nose and face; eyes appear more centered between tip of nose and top of head; squarish body proportions; 1.2 m (4 ft.) high at the shoulder; seldom found alone.

## EVIDENCE OF SEX, SPECIES AND CLASS

In the case of **moose, elk, deer, antelope, bison and non-trophy sheep** the evidence of sex, species and class must remain attached to the carcass (cannot be surgically or otherwise removed) until:

- the carcass is delivered to a premises in respect of which there is a Food Establishment Permit issued under the *Public Health Act* or Licence for the Operation of an Abattoir issued under the *Meat Inspection Act*, or
- the carcass is cut up and packaged for consumption at:
  - the usual residence of the person who killed the animal, or
  - the usual residence (a residence that is neither a business premises nor attached to such a premises) of a resident of Alberta and that resident is in attendance.

The evidence of sex, species or class that must be retained is as follows:

- moose, elk, deer, antelope, bison and non-trophy sheep** – attached to the same part of the animal to which the tag is affixed, **one** of the following:
  - testicles, scrotum, or udder, and in the case of deer only, the completely haired tail, or
  - the head with horns or antlers attached if the animal has horns or antlers, or
  - the head (complete with the skin on it) if the animal has no horns or antlers, **and in addition**

- the complete skull plate with horns or antlers intact must be retained with the carcass of the male antelope, male elk or male non-trophy sheep
- the complete head must be retained with the carcass of a calf moose harvested under authority of a Calf Moose Special Licence.
- cougar** – one of the following attached to the skin and visible until compulsory registration is complete:
  - in the case of a male, the scrotum
  - in the case of a female, a teat or a portion of a mammary gland.

To retain the scrotum or udder, cut to one side of the scrotum or udder when opening the animal for gutting. If you skin your game, the scrotum or udder must remain attached to the portion to which the tag is affixed. If you remove the testicles and penis, leave the entire scrotum intact. The meat will not be tainted.

**Deboning:** a hunter can debone a carcass while in the field and still follow the requirements described above for moose, elk, deer, antelope, bison and non-trophy sheep. It's not necessary for the full hind quarter of meat to remain intact while still bearing the required evidence, provided that portion of the leg and tendon where the tag is attached also has the evidence of sex, species or class still attached to it.

## TAGGING

NOTE: Antlered moose, elk and deer must **NOT** be tagged around the antler base. Please review the following instructions.

**Immediately** after killing a big game animal, the appropriate tag(s) must be affixed and securely locked to the animal as follows:

- trophy sheep, goat** – one tag through the nostril and, as soon as the skin is removed from the skull, one tag around the lower bone of the eye socket leaving the horns and eye intact.
- moose, elk, deer, antelope, bison and non-trophy sheep** – through the space between the bone and the tendon of a hind leg directly above the hock and around either the bone or the tendon.
- bear and cougar** – to the skin.

### Partner Licence

Upon killing an animal, a partner must immediately inform the primary licence holder (and vice versa – if the primary licence holder kills the animal, he or she must immediately inform the partner) of the killing. The primary licence holder must, immediately upon arriving at the carcass, tag the animal in the normal fashion (See page 17 for more information).

Tags must remain affixed until, in the case of

- trophy sheep, goat** – the animal is registered (page 44) and the skin is processed.
- moose, elk, deer, antelope, bison, non-trophy sheep or turkey** – the carcass is delivered to a place where it is cut up and packaged for consumption, including:
  - a premises in respect of which there is a Food Establishment Permit issued under the *Public Health Act* or Licence for the Operation of an Abattoir issued under the *Meat Inspection Act*,
  - the usual residence of the person who killed the animal, or
  - the usual residence (a residence that is neither a business premises nor attached to such a premises) of a resident of Alberta and that resident is in attendance.
- bear and cougar** – the skin is processed.

To tag your kill using the adhesive tag associated with your licence, attach the wire loop to the animal as described above for various species and classes. Close and secure the loop by affixing the adhesive tag over the free ends of the wire.

## WILD GAME PROCESSING

Hunters are reminded that when big game (including boned meat) or game birds are taken to a business for butchering or other related processing services, there are requirements for the business to keep a record of the wildlife that has been submitted. This includes recording the date, the name and address of the person who delivered the wildlife, the name and address

of the person who killed the wildlife and their wildlife certificate number or wildlife identification number (WiN), the number of the licence under whose purported authority the wildlife was killed, and (if applicable) the tag number, and a description of the wildlife that in the case of a big game animal includes its sex.

## BOWHUNTING

**Note: The following applies to bowhunting other than with a cross-bow. For information about hunting with cross-bows, see page 59.**

Except for the hunting of black bear, coyote, cougar or wolf under the circumstances outlined on page 32, a Bowhunting Permit is required by anyone who hunts big game, game bird, wolf or coyote with a bow and arrow. Bowhunters with appropriate general or special licences may hunt during the general seasons, archery-only seasons and primitive weapon seasons. A Bowhunting Permit is required in combination with a big game licence. In some areas of the province, hunters require special licences to hunt certain species of big game – see season tables. A bowhunter who obtains an Antlered Moose Special Licence, Antlerless Moose Special Licence, Calf Moose Special Licence, Antlered Mule Deer Special Licence, Antlerless Mule Deer Special Licence, Antlered White-tailed Deer Special Licence, Antlerless White-tailed Deer Special Licence, Antlered Elk Special Licence, Antlerless Elk Special Licence or Landowner Special Licence may, if an early archery season is offered, hunt under the authority of that licence during the archery season but only in the WMU specified on the licence and only for the type and species of animal for which the licence was issued. Holders of a Landowner Special Licence are subject to the terms/conditions of their licence. Bowhunters are reminded that, in some situations, archery-only seasons for some species may be in progress at the same time as primitive weapon and rifle seasons for other species in the same WMU.

Persons hunting big game must use an authorized bow and an authorized arrow. An authorized bow is one that is held, drawn and released by muscular power and has a draw weight of not less than 18 kg (40 lb.). This is the number of kilograms (pounds) required to draw an arrow of 71 cm (28 in.) to its head. An authorized arrow is one that is not less than 61 cm (24 in.) in length that has a tip that bears a head that is not

intentionally designed to resist being withdrawn after it has penetrated an object. Furthermore, it must either have a solid, sharp cutting head of at least 7/8 inch in width, or a head that, when the arrow impacts, opens to present sharp cutting edges at least 7/8 inch in width.

Hunters are asked to remove their tree stands at the end of the hunting seasons unless permission has been granted by the landholder to do otherwise.

## HUNTING WITH CROSS-BOWS

Cross-bows may not be used to hunt big game during archery-only seasons. The only exception is for an eligible handicapped hunter who has obtained a cross-bow licence.

A Bowhunting Permit, as required by bowhunters using conventional archery equipment, is not required by persons who are hunting with cross-bows.

In accordance with federal regulations, cross-bows may not be used for waterfowl hunting.

Persons hunting big game with a cross-bow must use an authorized cross-bow and arrow (bolt). An authorized cross-bow is one that requires 100 pounds or more of pull to draw the string or cable to its cocked position. There is no restriction on arrow length, however it must have a tip that bears a head that is not intentionally designed to resist being withdrawn after it has penetrated an object. Furthermore, it must either have a solid, sharp cutting head of at least 7/8 inch in width, or a head that, when the arrow impacts, opens to present sharp cutting edges at least 7/8 inch in width.

## APOS Wildlife Management Scholarship

The Alberta Professional Outfitters Society (APOS) is offering a scholarship to post-secondary students enrolled in wildlife biology and management, wildlife conservation enforcement, or related studies. APOS is proud to support Alberta's aspiring wildlife professionals and the future of resource stewardship in our province.

Visit [www.apos.ab.ca](http://www.apos.ab.ca) for details.

## WILDLIFE COMPULSORY REGISTRATION

After harvesting **any** of the animals listed below, a hunter or guide who has personally accompanied a Non-resident or Non-resident Alien hunter must register the kill at a Fish and Wildlife office (page 13) within the specified time period. Where parts are required to be submitted, they must be submitted at the time the animal is registered in person by the hunter who killed the animal. Contact a Fish and Wildlife office (page 13) for further information.

- **Goat** (the incisor bar must be submitted);
- **Male sheep over 1 year of age** (the complete unaltered skull with horns and eyes intact, and cape and lower jaw removed) to a designated Fish and Wildlife Office. See page 13 for Designated Offices for registering sheep. You must call ahead to arrange a time to complete the registration process;
- **Cougar** (the skull and skin must be submitted, complete with the evidence of sex attached and visible). A premolar tooth will be retained for aging.
- **Bobcat** (the skin must be submitted complete with the evidence of sex attached and visible);

**Registration Deadlines** – Deadlines for registering harvests are:

- **Male sheep over 1 year of age** – not later than 7 days after the close of the open season in which the animal was killed or 14 days after the date on which the animal was killed, whichever occurs first.
- **Goat** – not later than 14 days after the close of the open season in which the animal was killed or 30 days after the date on which the animal was killed, whichever occurs first.
- **Cougar** – if taken on privately owned land by a landowner or occupant, see page 32 for requirements; if taken under a licence allocated to an outfitter, within 5 business days of the date of the kill; if taken under any other authority, within one business day following the date of the kill.
- **Bison taken in WMU 536 or 539** – not later than the end of the fifth usual business day after the animal was killed.

- **Bobcat** – before the skin is sold, processed or exported from Alberta or before the expiration of the period of 30 days after the bobcat was killed, whichever event comes first.

Persons registering goat, sheep, bison, cougar, and bobcat are required to provide the following information:

- species and sex of the animal,
- date and location of the kill.

As part of the registration process, trophy sheep horns will be fitted with a permanent identification marker. AEP has incorporated improvements to the sheep registration protocol which include the use of a new jig as well as allowing a Non-resident/Non-resident Alien hunter to have their guide register their ram on their behalf. Other animals may be marked in another manner or retained for examination.

Compulsory registration provides information about the relative numbers of males, females and young in big game populations. It also provides the dates and locations of the harvest. Age structure and sex ratios provide an indication of population productivity (how many young survive to become adults) and status (increasing, decreasing or stable). The population and harvest data can then be used to determine the harvest goals or quotas for following years. This valuable information, provided by hunters, is essential for managing cougars, goats, trophy sheep and wolves in Alberta.

It is a mandatory requirement to submit the heads of deer harvested from specific WMUs for CWD testing and research purposes within 30 days of when it was killed. See pages 3, 31 and 64 for details.

Summaries that include additional information on registering game animals taken under Constitutionally recognized hunting rights can be viewed at [open.alberta.ca/publications/hunting-by-treaty-indians-in-alberta-rights-responsibilities](http://open.alberta.ca/publications/hunting-by-treaty-indians-in-alberta-rights-responsibilities).

# BIG GAME SEASONS

## Prairie WMUs (100 Series & 732)

**Sunday hunting for big game is prohibited in Prairie WMUs (102–160).**

**Archery Only Seasons** are those where only a bow and arrow may be used to hunt.

**General Seasons** are those where either a firearm, cross-bow or a bow and arrow may be used.

■ Indicates seasons that apply only to hunters with applicable Special Licences. Refer to the 2021 Alberta Hunting Draws booklet for details.

**Note: It is a mandatory requirement to submit the heads of deer harvested from specific WMUs for CWD testing and research purposes. See pages 3, 31, 64 and 72 for details.**

Cougar and Black Bear Seasons – See pages 55 and 56.				

- <sup>1</sup> The Supplemental Antlerless White-tailed Deer Licence is issued with two tags. Both tags are valid for tagging a deer(s) hunted in any of the following WMUs: 200-208, 214-246, 250-260.
- <sup>2</sup> Hunters (including bowhunters) require a Firearms Discharge Permit to hunt in WMU 936. Hunters must contact the Cooking Lake/Blackfoot Grazing, Wildlife and Recreation Area office at **780-922-3293** for information on requirements to obtain the discharge permit. In WMU 936, vehicle access is permitted to the Staging Areas only. Horses are permitted only on designated trails and in open pastures. General area access is by muscular power only (bicycle or walking).
- <sup>3</sup> This season is open to hunting only by means of archery, cross-bow, muzzle loader or shotgun.
- <sup>4</sup> See page 40 for descriptions of 3-point or larger elk.

#### Additional hunting opportunities in the Parkland WMUs:

- Antlerless Deer (WMUs 212, 247 and 248) Licence. Holders of this licence may kill two antlerless deer, either white-tailed deer or mule deer, with a bow and arrow (but not a cross-bow) in WMUs 212, 247 and 248 during the archery-only season, S1 – N30.
- Foothills Deer Licence. Holders of this licence may kill 2 antlerless deer, either white-tailed deer or mule deer, with a bow and arrow, cross-bow, shotgun, or muzzle loader in WMU 212 on the following dates: D1 – D20 (Monday to Friday only). When hunting, they must carry written permission from the landowner involved.
- Additional Antlerless elk harvesting opportunities in WMU 212 are being made available due to increasing elk populations in these WMUs. These are: 1) WMU 212 Antlerless Elk Archery Licence. Holders of this licence may kill 2 antlerless elk with a bow and arrow (but not a cross-bow) during the archery only season. S1-N30; 2) WMU 212 Antlerless Elk Special Licence. Holders of this licence may kill 2 antlerless elk.
- Camp Wainwright Deer Special Licence. Refer to page 58 for season dates or the **2021 Alberta Hunting Draws** booklet for further details.
- Strathcona White-tailed Deer Licence. Holders of this licence may kill **three** white-tailed deer, only 1 of which may be antlered, with a bow and arrow, cross-bow, muzzle loader or shotgun in that portion of WMU 248 within the Counties of Strathcona and Leduc between the following dates: O25 – D7. Information about this hunt is available from the Fish and Wildlife office in Edmonton and from Strathcona County Hall, 2001 Sherwood Drive, Sherwood Park.

Join Alberta's oldest archery club for exclusive 24/7, year-round access to an indoor range and one of Western Canada's best outdoor ranges (90m FITA range, field course, & year-round 3D trails).

**New this year!** Three free months added to the end of the 2020/2021 memberships, if purchased before July 30. Or buy a 2022 membership (starting in October of 2021) and get three free months (Oct. - Dec. of 2021) added to your 2022 membership! By August 2021, we will also have a **brand-new indoor range** building.

Memberships sold online at [www.sherwoodparkarchery.com](http://www.sherwoodparkarchery.com) giving you immediate access to our range facilities.

**All this is available to you for a low \$224.65!**

## STARKY'S TAXIDERMAY

EDMONTON

- Full Mounts
- Head Mounts
- Bird Mounts
- Rugs

Serving Alberta's sportsmen since 1985. Recreating your memories for years to come with quality workmanship at affordable prices. As many of you know, my son Colin has been doing the bird mounts for the past 8 years with exceptional quality which gives us a quick return on them. Thanks again for your support and good luck this season.

It is unlawful to hunt any wildlife or **discharge a firearm** between one-half hour after sunset and one-half hour before sunrise.

These times apply only to the specific location and specific day (not numerous days).

If hunting in between two listed communities, hunters can calculate what time would apply in their location.

To establish specific times for sunrise/sunset, refer to the National Research Council Canada ([nrc-cnrc.gc.ca/eng/services/sunrise/advanced.html](http://nrc-cnrc.gc.ca/eng/services/sunrise/advanced.html))

Trophy Sheep <sup>3</sup>	Resident		S8 - O31	302 <sup>4</sup> , 303, 306, 308
<b>Cougar and Black Bear Seasons – See pages 55 and 56.</b>				

\* The special licence season for antlerless moose in WMU 353 and antlerless elk in WMUs 338 and 344 applies only to a portion of the WMU.

<sup>1</sup> The Supplemental Antlerless White-tailed Deer Licence is issued with two tags. The FIRST tag issued with the licence (but NOT the second tag) is valid for tagging a deer hunted in one of the following WMUs: 346, 347, 349, 351, 354, 356-360. Both tags are valid for tagging a deer(s) hunted in any of the following WMUs: 300, 302, 304, 305, 310-314, 320, 322, 332-337, 344, 348, 350, 352, 353 and 355.

<sup>2</sup> See page 40 for descriptions of 3-point or larger elk.

<sup>3</sup> Hunting sheep is prohibited in several areas. See Restricted Areas for Trophy and Non-trophy Sheep on page 37.

<sup>4</sup> WMU 302 is open only for full-curl rams.

**Additional hunting opportunities** in the Foothills WMUs:

- WMU 300 Elk Special Licence and Non-trophy Sheep Special Licence. Refer to page 58 for season dates or to the *2021 Alberta Hunting Draws* booklet for further details.

Cougar and Black Bear Seasons – See pages 55 and 56.				

\* The draw season for antlerless elk in WMU 438, 441 and 444 applies only to a portion of the WMU. See draw booklet for maps.

<sup>1</sup> The Supplemental Antlerless White-tailed Deer Licence is issued with two tags. Both tags are valid for tagging a deer(s) hunted in any of the following WMUs: 440-446.

<sup>2</sup> See page 40 for descriptions of 3-point or larger elk and 6-point or larger elk.

<sup>3</sup> The season for trophy sheep in WMU 444 applies only to the portion south of the Beaverdam Road.

<sup>4</sup> The draw season for trophy sheep in WMU 444 applies only to the portion north of the Beaverdam Road.

<sup>5</sup> Hunting of sheep is prohibited in several areas. See Restricted Areas for trophy and non-trophy sheep on page 37.

<sup>6</sup> WMU 400 is open only for full-curl rams.

<sup>7</sup> These seasons are only valid for hunters who have obtained Trophy Sheep Special Licences through a Class S Outfitter or through a draw (Non-resident [Canadians] only).

<sup>8</sup> The draw season for trophy sheep is valid in Area 438C (See *2021 Alberta Hunting Draws Booklet*).

#### Additional hunting opportunities in the Mountain WMUs:

- Non-trophy Sheep Special Licence, Trophy Sheep Special Licence (portion of WMU 408 lying west of Highway 40 or in WMU 446 and that portion of WMU 444 north of Beaverdam Road or in WMU 438C). Refer to page 58 for season dates or to the *2021 Alberta Hunting Draws* booklet for further details.
- Castle Provincial Park (part of WMU 400): Hunters in WMU 400 need to be aware of the establishment of the Castle Provincial Park and Castle Wildland Provincial Park. Although hunting is permitted in both of these parks, hunting (including bowhunting) in Castle Provincial Park requires a firearm discharge permit. Firearm discharge permits are not required to hunt in Castle Wildland Provincial Park. Firearm discharge permits are available online at: [albertaparks.ca/media/6493998/2017-castle-permit-to-discharge-a-firearm.pdf](http://albertaparks.ca/media/6493998/2017-castle-permit-to-discharge-a-firearm.pdf). For more information call: 403-627-1165 or visit [albertaparks.ca/hunting](http://albertaparks.ca/hunting)

# Know the regulations.

# BIG GAME SEASONS

## Boreal WMUs (500 Series & 841)

**Archery Only Seasons** are those where only a bow and arrow may be used to hunt.

**General Seasons** are those where either a firearm, cross-bow or a bow and arrow may be used.

■ Indicates seasons that apply only to hunters with applicable Special Licences. Refer to the 2021 Alberta Hunting Draws booklet for details.

**Bison** – In the area west of highway 35 and north of the Chinchaga River and the Keg River Metis Settlement, bison is a protected species. No one is allowed to hunt bison in this area, except under the authority of a Bison Special Licence.

**Note: It is a mandatory requirement to submit the heads of deer harvested from specific WMUs for CWD testing and research purposes. See page 3, 25 and 64 for details.**

- 1 The FIRST tag issued with the licence (but NOT the second tag) is valid for tagging a deer hunted in one of the following WMUs: 521-523, 526, 527, 535 and 537. Both tags are valid for tagging a deer(s) hunted in any of the following WMUs: 500-520, 524, 525, 528-534, 536 and 539-544.
- 2 If hunting with an outfitter, hunters should note these WMUs are split into two seasons: Sept. 1 – Oct. 31 or Nov. 1 – Nov. 30.
- 3 See page 40 for description of 3-point or larger elk and 6-point or larger elk.

## COUGAR SEASONS

### Fall Season

This season is open only to holders of a resident cougar licence. The use of dogs is prohibited during this season, and hunters may harvest one cougar of either sex.

### Winter Season

During this season, cougar may be hunted by holders of a resident cougar licence, non-resident cougar licence, or cougar special licence. The use of dogs is allowed. The cougar season in specific WMUs may close prior to the closing date on this table. There is a male quota and a female quota. If either the male quota or the female quota for those WMUs is reached, the season will remain open until the other quota is filled. Before hunting cougar in any WMU, hunters must ensure that the season in that WMU remains open by calling the toll-free cougar hotline (1-800-661-3729) and listening to the message listing current closures. The hotline is updated regularly and by calling after

4:30 p.m., hunters can confirm which units will be open the next day.

#### It is unlawful to:

- allow the skin of any cougar to be wasted, destroyed, spoiled or abandoned. See exemption for salvaging skin on page 32 – Access for Control of Livestock Predation.
- hunt a female cougar accompanied by a cougar kitten with spotted fur, or a cougar kitten with spotted fur.

#### Use of Predator Calls and Bait

Cougar may be hunted using mouth or hand operated calls. The use of electronic calls and bait are prohibited for hunting cougar.

More information on cougar management, including a map of hunting areas, is available at [mywildalberta.com](http://mywildalberta.com).

#### Radio Collared Cougars

Cougars are being radio collared in parts

of Alberta to better inform population management. It is legal to shoot a radio collared cougar. If you harvest a collared cougar, you must submit a report to a local Fish and Wildlife office (page 13). If you have the opportunity to shoot a collared cougar and choose not to, please record the location and phone Paul Frame at (780) 422-8411 with this information, which will be important for the study.

### ATTENTION: ALL RESIDENT COUGAR HUNTERS!

If you purchase a cougar licence for the fall season, it can be used for the winter season.

### ATTENTION COUGAR HUNTERS!

If possible, cougars should be brought in for registration in an unfrozen condition so the premolar tooth can be removed. It is also helpful to prop the jaw open with a stick before rigor sets in.

Cougar Season	SEASON		WMUs

		Dec. 1, 2021 – Mar. 31, 2022	300, 302, 303, 304, 305, 306, 308, 310, 312, 314, 316, 318, 320, 322, 324, 326, 328, 330, 332, 334, 336, 337, 338, 339, 340, 342, 344, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 400, 402, 404, 406, 408, 412, 414, 416, 417, 418, 420, 422, 426, 428, 429, 430, 432, 434, 436, 437, 438, 439, 440, 441, 442, 444, 445, 446, 505, 507, 509, 510, 511, 512, 515, 516, 517

# BLACK BEAR SEASONS

## Black Bear Baiting

Baiting of black bears is permitted in the following WMUs: **322, 330-338, 348, 358-360, 500-506, 509, 510, 512-520, 522, 523, 529-536, 539-544 and portions of WMUs 320, 324, 357, 507, 521, 526 and 528** (Check with local Fish and Wildlife offices, page 13 or visit [mywildalberta.com](http://mywildalberta.com) to view the maps where black bear baiting is restricted in these WMUs). However, the following restrictions also apply:

1) Baiting is prohibited within 1.6 km (1 mi.) of occupied dwellings. Owners and occupants of dwellings are exempt from this restriction if they have permission to bait from the owners or occupants of all other dwellings within 1.6 km (1 mi.) of the bait. Other persons may also bait within 1.6 km (1 mi.) of an occupied dwelling if the bait has been authorized in writing by the

owners or occupants of that dwelling and all other dwellings within 1.6 km (1 mi.) of the bait.

2) Baiting is prohibited within 1.6 km (1 mi.) of Provincial Parks that are not designated as Wildland Provincial Parks, provincial and forest recreation areas and some industrial sites. For more information on baiting in parks, see page 34.

3) Each bait site must have a readily observable sign legibly showing the owner's name, WiN, Big Game Outfitter Permit number, or Big Game Guide Designation Number.

4) Each bait must be posted with surrounding signs to warn other people of its presence.

5) Baiting is restricted to the open season and the preceding two weeks in each specific WMU.

6) During November in WMUs or partial WMUs where baiting is permitted, only meat or meat products may be used for bait.

Contact a Fish and Wildlife office (page 13) for legal land descriptions or more information. Hunters are reminded that Alberta's

*Environmental Protection and Enhancement Act, Animal Health Act and the Public Health Act* apply to baiting situations. Any livestock dying other than through proper slaughter for human consumption must be disposed of in prescribed ways and may not be used for baiting bears. Containers or wrappings made of paper, cardboard, plastic or other materials should not be left at bait sites. For the safety of others, baits should not be placed near active work sites (e.g., tree planting locations) and all bait sites must be cleaned immediately after the bear season.

## Supplemental Black Bear Licences

Supplemental Black Bear Licences are available in the following WMUs: **224, 250, 258, 260, 320-360, 429, 445, 500-544 and 841.**

### It is unlawful to:

- allow the skin of any bear to be wasted, destroyed, spoiled, or abandoned. See exception for salvaging skin on page 32 – Access for Control of Livestock Predation.
- hunt a black bear under the age of one year or a female black bear accompanied by a cub under the age of one year.

## ATTENTION BEAR AND COUGAR HUNTERS!

**Trichinosis** – To prevent possible trichinosis, a parasitic infection, bear and cougar meat should be thoroughly cooked before it is consumed by humans or pets.

Spring 2022 (Requires a new year licence)	Apr. 1 – May 31		212, 410
		Apr. 1 – May 15	400, 404, 406, 408, 841
		Apr. 1 – June 15	200, 202, 203, 204, 206, 208, 214, 216, 220, 221, 222, 224, 226, 228, 230, 232, 234, 236, 238, 240, 242, 244, 246, 250, 252, 254, 256, 258, 260, 300, 302, 303, 304, 305, 306, 308, 310, 312, 314, 316, 318, 320, 322, 324, 326, 328, 330, 332, 334, 336, 337, 338, 339, 340, 342, 344, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 402, 412, 414, 416, 417, 418, 420, 422, 426, 428, 429, 430, 432, 434, 436, 437, 438, 439, 440, 441, 442, 444, 445, 446, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 534, 535, 536, 537, 539, 540, 541, 542, 544

# VOLUNTARY BLACK BEAR TOOTH SUBMISSION PROGRAM

The department has initiated a 3-year pilot voluntary black bear tooth collection program in two parts of the province. Data generated from laboratory tooth analysis will allow biologists to determine black bear age structure, reproductive statistics, and better inform black bear management. Laboratory aging of an animal is based on the cementum annuli growth in the tooth.

Fish and Wildlife are asking successful hunters to take the skull to an identified Fish and Wildlife office where staff will extract a premolar tooth. The premolar tooth is a small peg-like tooth located just behind the canines. Skulls submitted in a frozen state will be kept for a period of time to allow for thaw and extraction, whereupon the skull will be frozen and returned to the hunter. Extraction of a premolar tooth will not impair the display quality of a skull.

Alternatively, hunters can extract a premolar tooth in the field or request it of a taxidermist. The tooth can either be presented with the necessary harvest information to an identified Fish and Wildlife office or mailed in using a tooth submission envelope. Extraction is easily done just after the bear has been harvested when the jaw is still pliable. The tooth is easily loosened by running a knife blade on all sides of the tooth below the gum line and rocking the tooth back and forth. The tooth can then be removed with pliers. Care should be taken to ensure the root remains intact. Ensure that the tooth is free of tissue and dry prior to submission.

Information required as part of the program are harvest date, sex of bear, WiN, WMU where harvested, and either legal land location or latitude/longitude of kill site. When available, results for each tooth will be accessible online under your WiN number on the My Wild Alberta website ([mywildalberta.com](http://mywildalberta.com)). Only WMUs 318, 320, 322, 324, 326, 328, 330, 332,

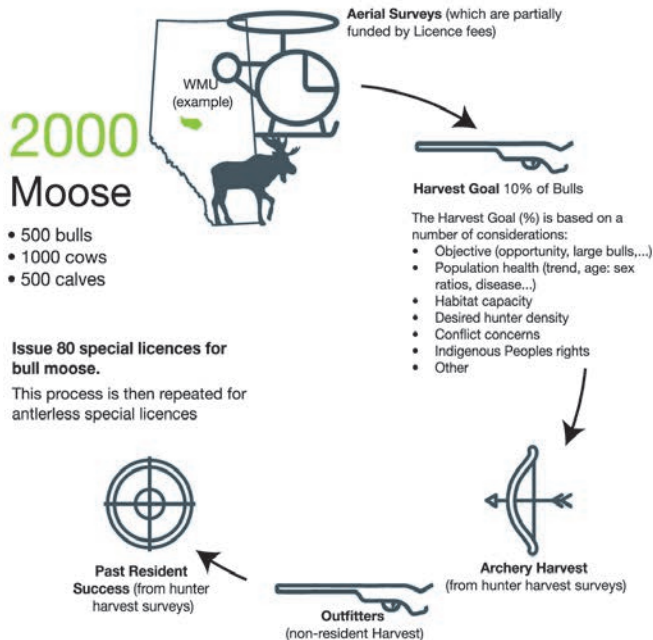

500, 501, 502, 503, 504, 506, 509, 510, 511, 512, 514, 515, 516, 517, 518, 519, 529, 530, and 531 are open to this program.

Fish and Wildlife offices accepting skulls or tooth submissions are: Fort McMurray, Lac La Biche, Athabasca, Bonnyville, Cold Lake, Rocky Mountain House, Sundre and Drayton Valley.

## Special licences for resident hunters

How does Alberta Environment and Parks determine the number of special licences for resident hunters in general season?

## Keep the dirt where it belongs

**Prevent the spread of soil borne disease and invasive plants.**

Wash your vehicles and remove any mud or plant materials before unloading.

Access to agricultural lands is a privilege and agricultural producers work hard to manage clean and healthy cropland. Do your part to keep agricultural disease and noxious weeds from spreading.

Alberta

## ADDITIONAL SPECIAL LICENCE DRAW HUNTS

**Season Dates And Locations** (refer to page 14 for month abbreviations)

### Non-trophy Sheep Special Licence

Areas 416, 418A*, 418B*, 418C*, 420, 422A*, 426A*, 430B*, 432, 434A*, 434B*, 437, 438A*, 438C*, 438D*, 440, 442, 444, 445A*, 445B*, 446 .....	S10 - O31
Areas (402 – 303, 306)*, 402 – 308*, 402A*, 404B*, 406A*, 406B*, 408A*, 408B* .....	S10 - O31
Area 410 .....	S10 - N30

\* These areas comprise either a portion of one WMU or all of one WMU and a portion of an adjacent WMU. See descriptions in the **2021 Alberta Hunting Draws** booklet.

### Camp Wainwright Deer Special Licence (WMUs 728 and 730)

Bow and arrow or muzzle loader .....	D2 - D4
Rifle .....	D6 - D8, D9 - D11, D13 - D15, D16 - D18

### Antelope Archery Special Licence

WMUs 102, 104, 106, 108, 112, 116, 118, 119, 124, 128, 138, 140, 142, 144, 148, 150, 151, 152, 160, 162, 163, 164, 166 .....	S1 - S25
--	----------

### Trophy Antelope Special Licence

WMUs 138, 142, 144, 150, 151, 152, 160, 162, 163, 164, 166 .....	S27 - O2
WMUs 102, 104, 106, 108, 112, 116, 118, 119, 124, 128, 140, 148 .....	O18 - O23

### Non-trophy Antelope Special Licence

WMUs 138, 142, 144, 150, 151, 152, 160, 162, 163, 164, 166 .....	S30 - O2, O4 - O6
WMUs 102, 104, 106, 108, 112, 116, 118, 119, 124, 128, 140, 148 .....	O21 - O23, O25 - O27

### Either Sex Elk Special Licence

WMUs 728 and 730 .....	CLOSED for 2021
------------------------	-----------------

### WMU 300 Elk Special Licence

WMU 300 .....	S8 - O24, O25 - D24, D25 - F21, 2022
---------------	--------------------------------------

Refer to the **2021 Alberta Hunting Draws** booklet for details on what seasons will be open and how to apply for special licences.

## OTHER SPECIES

**NOTE:** It is unlawful, with the following exceptions, to allow the pelt of any furbearing animal to be wasted:

It is not legally necessary to salvage pelts of 1) furbearing animals taken in accordance with regulations authorizing control of problem wildlife, or 2) coyotes harvested, by residents, outside of public lands in the Green Area.

**Timber Wolf** – A Resident may, without a licence, hunt (but not trap) timber wolf from the opening of any big game season in a particular WMU to May 31, 2022, or until June 15, 2022 in WMUs where black bear seasons are open until June 15, 2022.

A Non-resident or Non-resident Alien who holds a Non-resident/Non-resident Alien Wolf/Coyote Licence may hunt (but not trap) timber wolf from the opening of any big game season in a particular WMU to May 31, 2022, or until June 15, 2022 in WMUs where black bear seasons are open until June 15, 2022.

**Coyote** – A Resident, Non-resident or Non-resident Alien who holds a Non-resident/Non-resident Alien Wolf/Coyote licence may, **except in WMUs 728 and 730, hunt (but not trap) coyote**

- throughout the year on privately owned land and on public land in the White Area, to which he or she has the right of access to hunt;
- on public lands in the Green Area to which he or she has the right of access to hunt, from the opening day of a big game season in a particular WMU to May 31, 2022 or until June 15 if the hunting is in a WMU that has a spring season for black bear ending on that date.

In Camp Wainwright (WMUs 728 and 730) a Resident may hunt coyote from January 5, 2022 until March 1, 2022.

**Baiting for Wolves and Coyotes** – On public land, hunters cannot use bait for hunting wolves or coyotes except a) from Dec. 1 to Mar. 31, or b) during an open season for the hunting of black bear where the setting out, use and possession of bait for the purpose of hunting black bear is permitted.

Each wolf or coyote bait site must have a readily observable sign showing the owner's name, WiN, Big Game Outfitter Permit Number, or Big Game Guide's Designation Number.

These baiting restrictions do not apply to WMUs 102-166, to persons hunting under authority of a trapping licence, or on any private land.

**Red Fox** – A Resident may, without a licence and at all times of the year, hunt (but not trap) red fox on any privately owned land to which he or she has the right of access.

**Red Squirrel and Badger** – A Resident may, without a licence and at all times of the year, hunt or trap red squirrel and badger on any privately owned land to which he or she has the right of access.

**Bobcat** – A resident may, without a licence from November 1 - February 28, 2022, hunt (but not trap) bobcat in WMUs 102, 104, 106, 108, 112, 116, 118, 119 and in the portion of WMU 110 that lies east of highway 2 and south of highway 3. The use of dogs is prohibited. All kills must be registered at a Fish and Wildlife office (see page 13).

**Other Animals** – Porcupine, rabbit, hare, raccoon and woodchuck may be hunted, but not trapped\*\*, without a licence throughout the province, at all times of the year. Skunk may be hunted and trapped.

\*\* Some exceptions apply. Please refer to the **2021 Alberta Guide to Trapping Regulations**, available in September 2021.

## Please Remember

Federal regulations prohibit the use of lead shot or cross-bows for hunting waterfowl.

## BE AWARE!

### IN ALBERTA WHOOPING CRANES ARE PROTECTED

Whooping Cranes are listed as an Endangered Species in Alberta. Be sure your target is not a whooping crane.

### IN ALBERTA SAGE GROUSE ARE PROTECTED

Sage grouse are listed as an endangered species in Alberta. Be sure your target is not a sage grouse.

### IT IS PROHIBITED TO HUNT SHARP-TAILED GROUSE

IN MANY WMUS WITHIN ALBERTA (see page 60 for allowed WMUs) Be sure of your target. For a more detailed description of Sharp-tailed Grouse, please go to: [mywildalberta.ca/hunting/game-species/default.aspx](http://mywildalberta.ca/hunting/game-species/default.aspx)

All birds are protected except the following: Starlings, Crows, Pigeons, House (English) Sparrows, Magpies, Blackbirds, Common Grackles, Brown-headed Cowbirds, Ravens (hunted on private land by residents and public land under an agricultural disposition) and any other birds for which an open season has been declared by the regulations as indicated in this summary.

### Whooping Cranes

- White body with black wing tips. Juveniles have a mixture of white and brown body feathers with black wing tips.
- Wingspan – 7 feet.
- Flocks of 2 to 7, sometimes migrate with sandhill cranes.

Red Mask

### Sandhill Cranes

- Grey or brown body.
- Wingspan – 5 feet.
- Flocks of 2 to hundreds.

Red Crown

## Falconry Hunting

Falconers are permitted to hunt upland game birds and migratory birds, by means of falconry, in all areas of the province except in national parks and those restricted areas identified on pages 34 to 37.

To hunt any game birds by means of falconry, Recreational Falconry Permit holders must possess all the same hunting licence(s) as those who would hunt game birds with firearms are required to possess (see page 24).

### Seasons

The open season to hunt upland game birds by means of falconry is from August 15, 2021 to March 31, 2022. Migratory game birds may be hunted by means of falconry during the designated open season for migratory birds (page 60).

## Bowhunting

Hunters wishing to hunt game birds with a bow and arrow, other than a cross-bow, require a Bowhunting Permit in addition to the other applicable licences.

In accordance with federal regulations, cross-bows may not be used for waterfowl hunting.

## Special Hunting Areas

In WMUs 212, 247 and 248 the hunting of game birds is only permitted with bows and arrows, cross-bows, shotguns or a falconry bird. Cross-bows cannot be used to hunt migratory birds.

In WMU 410 the hunting of game birds is permitted only with bows and arrows or a falconry bird.

## Spring Snow/Ross's Goose Hunting Season

Alberta has a spring snow/Ross's goose hunting season from March 15 through June 15 annually. Please refer to the game bird hunting table on page 60 for valid WMUs. Regular fall hunting restrictions and daily bag limit (50) apply. As in the fall hunting season, there is no longer a possession limit for snow/Ross's geese.

**NOTE:** While it is illegal to hunt migratory game birds with a single projectile (e.g. .22 rim fire, or center fire rifle), it is legal to use them to hunt upland game birds (this does not apply to hunting on game bird shooting grounds or hunting for wild turkey).

## GAME BIRD SEASONS AND BAG LIMITS

Where a dash (-) is used between WMUs in the following table, the dash is to be interpreted as including all WMUs that have numbers falling between the two WMUs listed.

Species	Daily Limit	Possession Limit	WMUs	Season Date	Requirements
Snow or Ross's Geese	50 combined	No Limit	200-208, 216-260, 316-544, 841, 936	S1 - D16 / M15 - Ju15	(a) of which not more than five may be white-fronted geese.
			102-166, 210-214, 300-314	S1 - D21 / M15 - Ju15	
Canada or White-fronted Geese	8 (a) combined	24 (b) combined	200-208, 216-260, 316-544, 841, 936	S1 - D16	(b) of which not more than fifteen may be white-fronted geese.
			102-166, 210-214, 300-314	S8 - D21	
Ducks, Coots and Snipe	8 (c) each	24 (d) each	200-208, 216-260, 316-544, 841, 936	S1 - D16	(c) of which not more than two ducks may be goldeneye for non-resident aliens.
			102-166, 210-214, 300-314	S8 - D21	
Sandhill Crane	5	15	200-208, 220, 222, 226-244, 247-260, 500	S1 - D16	(d) of which not more than six ducks may be goldeneye for non-resident aliens.
			102-106, 112-166, 210	S8 - D21	
Male Pheasant	2	6	200-260, 314-402, 412-544	S1 - J15	(e) may harvest with a special licence only.
			102-166, 300-312	O15 - N30	
			404-410, 841, 936	S8 - J15

			936	S8 - J15	
Wild Turkey	1 (e)	1 (e)	300-308, 400, 402	■ Ma1 - Ma31, 2022	

**ATTENTION WMU 936 HUNTERS:** All hunters for WMU 936 must complete a safety orientation and require a firearms discharge permit. Safety orientation and firearms discharge permits may be obtained online through the Alberta Parks web site. Please contact the Cooking Lake/Blackfoot Grazing, Wildlife and Recreation Area office, (780-922-3293) in order to receive information regarding orientation dates and requirements for obtaining your discharge permit.

**ATTENTION WMU 728 & 730 (Camp Wainwright) HUNTERS:**

**WARNING:** Hazards in the form of unexploded military munitions may exist throughout Camp Wainwright. Hunters are advised not to touch any foreign objects. **Camp Wainwright officials have advised that all hunters using shotguns to hunt game birds at Camp Wainwright must use non-toxic shot. Lead shot is not allowed.**

**ATTENTION PHEASANT HUNTERS:** A map and description of all pheasant release sites, including time restrictions can be found on the Alberta Conservation Association website at [ab-conservation.com/programs/wildlife/provincial-pheasant-release-program/](http://ab-conservation.com/programs/wildlife/provincial-pheasant-release-program/) or by calling 1-877-969-9091.

**ATTENTION LATE SEASON BIRD HUNTERS:** Later season dates for bird game may overlap with active trapping in some areas. Please take the necessary precautions to ensure the safety of hunting dogs.

### WATERFOWLER HERITAGE DAYS

The first Saturday and Sunday in September are designated as Waterfowler Heritage Days in Alberta. Youth (age 10-17) may hunt waterfowl on these dates without a licence (provincial or federal) provided they are qualified to do so (see Licensing requirements for first-time hunters, page 15 and 17) and are accompanied by an adult migratory game bird hunting permit holder. The adult permit holder may not have in their possession or use a firearm, or accompany more than 2 minors at one time while mentoring youth. The youth can only hunt waterfowl species for which there will be an open season in that WMU. Regular bag limits and possession limits apply.

## WILD TURKEY DRAW

Please refer to items 1, 11 and 12 of Prohibitions, Game Bird section (page 29) for additional requirements concerning weapons and evidence of sex and species for wild turkey.

### Differentiating Between Males and females

The gobbler (male) has a fleshy growth (wattle) which hangs from the under side of the throat or chin. Males also exhibit fatty growths (caruncles) located on the side and back of the neck and on the lower throat. A fleshy projection above the bill of males (snood, or dew bill) will also distinguish males from females.

Common Characteristics to Differentiate Males and Females		
Characteristic	Female	Male
Beard	Very rare, short	Regularly, up to 25cm (10") long
Gobble	Never	Frequently, especially in spring
Head Colour	Grey-brown, grey-blue	Bright turquoise blue, bright red, bright blue, sometimes grayish white

It is unlawful to hunt any wildlife or **discharge a firearm** between one-half hour after sunset and one-half hour before sunrise.

Sunrise/Sunset Table (Mountain Daylight Time)		
Date	Sunrise	Sunset
May 01, 2022	6:20 AM	9:00 PM
May 05, 2022	6:13 AM	9:06 PM
May 10, 2022	6:06 AM	9:14 PM
May 15, 2022	5:58 AM	9:21 PM
May 20, 2022	5:52 AM	9:27 PM
May 25, 2022	5:47 AM	9:33 PM
May 30, 2022	5:42 AM	9:39 PM

### ATTENTION TURKEY HUNTERS

Fish and Wildlife will be conducting a hunter harvest survey after the fall hunting season to obtain information required for turkey management. Your cooperation and assistance in collecting and providing the necessary information is required. We request that you keep track of the number of days hunted in each WMU.

## Marked Wildlife

Some species of wildlife are banded, collared or marked by other means in an ongoing effort to gain additional population biology information.

A person who kills a wildlife animal or finds a dead wildlife animal that has been fitted with a device for the purpose of tracking the animal's movements must submit a completed report provided by Fish and Wildlife.

Some of these marked wildlife, as well as certain nuisance animals (e.g., some black bears), may have received drugs for research purposes or to

facilitate their capture and handling. Any such animal will be marked with a tag advising that the meat of the animal should not be consumed before contacting Fish and Wildlife of Alberta Environment and Parks.

### Report Waterfowl Leg Bands by Telephone or Internet

All waterfowl leg bands recovered in North America can now be reported by telephoning the toll-free number **1-800-327-BAND** (1-800-327-2263). Band recovery can also be reported by internet at the website [reportband.gov](http://reportband.gov).

## Wild Game Public Health Advisory

The wild game public health advisory for the Swan Hills area – originally issued on December 13, 1996, by the Provincial Health Officer – has been revised as a result of more extensive wild game testing. While recent test results confirm that eating wild game from the Swan Hills area poses no immediate threat to human health, it is recommended that individuals limit the amount of wild game eaten.

For more information contact Alberta Health and Wellness at 780-427-7164 or visit My Wild Alberta at [mywildalberta.ca/hunting/safety-procedures/harvested-wildlife-human-health.aspx](http://mywildalberta.ca/hunting/safety-procedures/harvested-wildlife-human-health.aspx).

# REPORT A POACHER

[www.reportapoacher.com](http://www.reportapoacher.com)

**1-800-642-3800**

## IMPORTANT THINGS TO KNOW:

Report A Poacher can be reached all day, every day.  
**1-800-642-3800.**

- All calls are kept strictly confidential and you can remain anonymous.
- If you see something that may be poaching, record as much information as possible:
  - Date and time
  - Location
  - Vehicle description and licence number
  - Description of who was involved in the crime
  - Details of the violation and any other details you can think of, no matter how insignificant they might seem
- The information you provide could lead to a conviction (and possibly a reward for your help).
- Poaching covers a wide range of violations including:
  - Fishing or hunting out of season
  - Night hunting
  - Hunting from the road
  - Exceeding limits
  - Hunting while intoxicated
  - Illegal sales of wildlife or fish
- The Report A Poacher line can also be used for reporting major violations to land and habitat such as tree harvesting or destruction of stream beds.
- Please familiarize yourself with Alberta's Hunting and Fishing regulations to help protect Alberta.

# BE OUR GUEST.

CLAS Members have confirmed and exclusive access to over 6,000 prime properties and a wide choice of recreational opportunities. # CHRONIC WASTING DISEASE AND DEER MANAGEMENT

Chronic wasting disease (CWD) is a chronic degenerative and ultimately fatal prion disease of cervids (primarily mule deer in Alberta). It is not known to infect humans but health authorities advise against eating any animal known to have any prion disease. In Alberta, CWD occurs in eastern and east central regions and particularly in the Battle River and Red Deer/South Saskatchewan watersheds. Up to date information, including maps of previous cases is available on our wildlife disease web pages at [alberta.ca/chronic-wasting-disease-updates](http://alberta.ca/chronic-wasting-disease-updates).

Hunters and outfitters play a key role in assisting big game management by helping to reduce deer numbers and by providing heads from harvested deer for the ongoing CWD surveillance program. Alberta began looking for CWD in wild deer in the hunting seasons in 1998. Since then, we have tested over 95,000 heads and found CWD in 3,044 mule deer, 525 white-tailed deer, 13 elk, and 3 moose.

**Note :** It is a mandatory requirement to submit the head of all DEER harvested in the following WMUs: 150, 151, 163, 200, 224, 226, 234, 236, 242, 244, 246, 248 (as modified in 2021), 250, 402, 404, 501, 502, 504, 506, 514, 728 and 730. It is also mandatory to submit heads from harvested MULE DEER in WMUs 102, 104, 106, 108, 110, 112, 130, 132, 210, 212, 214, 216, 220, 221, 222, 304, 305, 306, 308, 310, 312 and 314. Antlers and skull plate can be removed from bucks before the head is submitted. For European mounts, in separate bags, collect a piece of brainstem from INSIDE the back of the skull AND all the tissues from the back of the throat. Put the two bags in a third bag and freeze.

All heads for testing, including samples (as above), must have a green CWD label which gives each head a unique identification number. **Be sure to include either GPS or land location as well as WMU and your WiN number for each head.** When available, test results for each head are sent to the email address in the hunter's AlbertaRELM account.

## CARCASS DISPOSAL

All hunters should properly dispose of their harvested carcasses, particularly animals taken in the CWD Risk Area. Where possible, debone meat making sure you keep the required evidence of sex and species. Hunters may prefer to avoid the spinal cord when deboning. Leave remainder of carcass at the kill site. If the carcass is transported elsewhere, remove all useable meat, then burn, bury, or dispose of the remains in a landfill.

For more information about CWD, contact your local Fish and Wildlife office or visit [alberta.ca/chronic-wasting-disease](http://alberta.ca/chronic-wasting-disease).

Alberta Health recommends that deer from the CWD mandatory areas be tested for CWD. For more information about potential human health risks associated with CWD contact health authorities.

## BILL OF LADING – WILDLIFE (To be used when transporting wildlife taken by others)

# Carcass Transportation and Handling

---

## Meat Processing:

- Do not process a deer that appears to be diseased.
- Process all deer individually, package separately, and label uniquely.
- Debone meat from deer and remove all fat, connective tissue, and lymph nodes.
- Avoid sawing through bone, spinal cord, brain, lymph nodes, or spleen.
- Avoid eating/handling the eyeballs, brain, spinal cord, spleen, and lymph nodes.
- Limit the amount of bodily fluids going to an area, such as a floor drain, that cannot be properly sanitized after use.

## Disposal:

- Deer parts should not be rendered for use in feed for other animals, or used as compost.
- Recommended disposal methods for unwanted portions of carcasses (bones, organs, etc.) are:
- Leave at the harvest site;
- Double-bag and send to an approved, lined landfill; or
- Deep burial (8 feet or deeper).

## Equipment Cleaning:

- Clean processing equipment between each deer.
- Thoroughly sanitize all equipment and workstations with a 50:50 solution of bleach and water.
- Soak tools for one hour in the bleach solution, and then rinse thoroughly with hot water.

## Field Dressing:

- Wear rubber or latex gloves when handling carcasses.
- When field dressing an animal, leave internal organs and inedible parts at the site of harvest.
- Avoid sawing through bone, spinal cord, brain, lymph nodes, or spleen.
- Store all portions of the animal to be transported in a container such as a cooler, bin, or bag that will not leak bodily fluids into the environment.

## COMMON LICENCE MISTAKES

### GENERAL MULE DEER LICENCE

This general licence is valid during the “archery only” season, which precedes the general season. It is valid during the general season in the following WMUs: 352, 353, 355, 440-446, 512-519, 528-534, 536, 539-542 and 841. This licence is not valid during a season in which a Special Licence is required. In the Alberta Guide to Hunting Regulations, special licences are required for all seasons where a small black box is located beside the season date.

### SUPPLEMENTAL ANTLERLESS WHITE-TAILED DEER LICENCE

The Supplemental Antlerless White-tailed Deer Licence is issued with two tags. The FIRST tag issued with the licence (but NOT the second tag) is valid for tagging a deer hunted in one of the following WMUs: 346, 347, 349, 351, 354, 356-360, 521-523, 526, 527, 535 and 537. Both tags are valid for tagging a deer(s) hunted in any of the following WMUs: 200-208, 214-246, 250-260, 300, 302, 304, 305, 310-314, 320, 322, 332-337, 344, 348, 350, 352, 353, 355, 440-446, 500-520, 524, 525, 528-534, 536 and 539-544.

### YOUTH MULE DEER LICENCE

This general licence is available for resident hunters who are 12-17 years of age and who are eligible to hunt. It is a general licence that is valid during the “archery only” season, which precedes the general season. It is valid during the general season in the following WMUs: 352, 353, 355, 440-446, 512-519, 528-534, 536, 539-542 and 841. This licence is not valid during a season in which a Special Licence is required. In the Alberta Guide to Hunting Regulations, special licences are required for all seasons where a small black box is located beside the season date.

### YOUTH/SENIOR WHITE-TAILED DEER LICENCE

This licence is valid for resident hunters who are 12-17 and 65 years of age and over who are eligible to hunt. It is a general licence and is valid during a general season (archery or rifle). Because it is a general licence, it can not be used during the rifle season in WMUs 404, 406 and 408 (a special licence is required). In the Alberta Guide to Hunting Regulations, special licences are required for all seasons where a small black box is located beside the season date.

### SUPPLEMENTAL BLACK BEAR LICENCE

This licence is only valid in WMUs 224, 250, 258, 260, 320-360, 429, 445, 500-544 and 841.

### SPECIAL LICENCES

If you are drawn for a special licence, your draw priority returns to zero and that draw cannot be cancelled. You may not be able to purchase a particular general licence once you have been drawn for a special licence of that same species. Example: if you are drawn for Antlered Mule Deer, Antlered White-tailed Deer or Antlered, Antlerless, or Calf Moose you will not be able to purchase a general licence for that species. If you are drawn for Either Sex Elk, WMU 300 Elk, Antlered or Antlerless Elk, you will not be able to purchase a general elk licence. Resident hunters are able to purchase an elk licence in combination with the WMU 212 Antlerless Elk Archery and the WMU 212 Antlerless Elk Special Licence. See licence combinations on page 19.

# Duck Hunting Alberta's *Big Waters*

by Ken Bailey

Hunting ducks on large bodies of water is among the most rewarding of the waterfowling pursuits.

Certainly, hunting grain fields or gunning small potholes has its charms; the shooting can be fast and furious, it's typically "clean", and access is easy. But simple, clean and quick mean you're missing what many consider the most fulfilling waterfowling. Each fall, as ducks of all species migrate, they gather on large bodies of water, offering a brand of waterfowling that stands as the highest form of the pastime.

Recent changes to Alberta's regulations have opened access to many lakes and rivers that for years were closed until November 1. These restrictions were established in the 1980s to provide undisturbed places for geese to roost, under the assumption this would hold birds in the area longer, providing better hunting opportunities. At the time, goose populations were a fraction of what they are today and hunting pressure was considerably greater. That theory was never proven, and today, with access increasingly becoming a barrier to hunting opportunities, it makes sound biological and sociological sense to reopen these waters.

If you want to enjoy success hunting big water, you need to prepare and execute differently than when hunting grain fields. Following are a few suggestions that should help.

## Scouting

Ducks don't use all of a lake proportionately. Thorough scouting will help you identify daily movement patterns—where birds feed, loaf and roost. Dabblers utilize different parts of lakes than do divers, and individual species within each group have their preferences; food is an important influencer and each species has a preferred diet. Spending time watching how, when and where ducks move will provide clues on how to hunt them. Wind direction can have a meaningful impact, so taking note of prevailing winds pays dividends in predicting where ducks will be found on any given day.

When scouting, identify potential blind locations in proximity to high bird-use areas— islands, points, throats and creek deltas are all likely locations. While ducks will fly all day, early morning and mid to late afternoon are usually best. For ducks that field feed, mid-morning can be prime time to target those returning after their morning feed. Scout waterbodies at the time of day you're most likely to hunt them.

## Blinds

You can hunt from a boat or from shore. When selecting a location for a shore blind, a crosswind situation helps ensure birds will pass across the front of your blind. Natural points and islands are good options, with the downwind side the better choice for blind location. Where possible, use natural cover for your blind.

Hunting from a boat provides greater options, but concealment is trickier. There are many commercial boat blinds available; most consist of aluminum framing interlaced with

camouflage netting or artificial grasses. Alternatively, tuck into cattail or bulrush beds.

## Decoys

You can pass shoot ducks without decoys from strategically located

positions, but decoys are a great benefit. Much has been said about the best spread patterns—V's, U's, W's, J's— they can all work. Fundamental, however, is ensuring you provide a landing area where you want to be shooting in relation to your blind.

# McNEICE OUTFITTING LTD.

## Offering Premier Elk, Whitetail, Mule Deer and Coyote Hunts to Both Resident and Non-Resident Hunters.

[www.vern@mcneiceoutfitting.com](mailto:www.vern@mcneiceoutfitting.com)

[www.mcneiceoutfitting.com](http://www.mcneiceoutfitting.com)

Space your decoys more widely apart than you would in a field, as it gives the appearance of more birds, and on big water, more decoys is usually better.

If you're specifically targeting diving ducks, consider running a long line, extending 100 to 200 metres angled downwind, anchored at both ends, with decoys spaced 5 to 10 metres apart. The near-shore end should begin just beyond your furthest single-line decoy on the upwind side of your set. When all works well, ducks cruising the lake

will turn on the long line, following it all the way into the landing zone.

### Calling

There are few prettier sights than ducks turning in response to masterful calling. On big water, there's little use for the "feeding chuckle" that is common when field hunting. Loud, attractor calls for mallards and other large dabblers such as the "hail" and "comeback" calls are of much more value. With the diversity of species available, wigeon, teal

and pintail whistles, and diving duck calls, all have their place; scaup and canvasback will turn to a well-executed "purr" as prettily as any greenhead has ever swung.

### Identify Ducks on the Wing

A benefit of hunting big water is the diversity of species; mixed bags are commonplace. However, if you're targeting a specific species, you must be able to identify them on the wing. Profile, colour, wing beat, voice, flight and flock characteristics all provide identification clues. Field guides and videos help, but there's no substitute for time in the field. Carry binoculars and make an effort to identify all the ducks you see, even those out of gun range.

### Guns and Loads

Shots are often on the long side, so a 12-gauge is the only practical option. Doubles can be awkward to load while sitting in a boat, and if there's ever a need for a third, anchoring shot, it's on the big water, so pumps and semi-autos are recommended.

Shot choices are many, from steel to the other non-toxics, and all can be effective if used within their ballistic capabilities. I would suggest, however, that if you were ever to invest in better and more expensive shot alternatives, this would be the time. The shooting can be challenging and large diving ducks are notorious for absorbing pellets. I prefer shot sizes #2 or #3 for the larger ducks, #4 or #5 for smaller ducks.

### Retrieving Birds

There's no substitute for a well-trained retriever, and you'll see them at their best when hunting large wetlands. However, the absence of a dog shouldn't prevent you from hunting large waterbodies, you just have to make retrieval a priority after each bird is downed; it doesn't take much wind or time for a duck to drift several hundred metres. In shallow water, waders are sufficient, but in deeper lakes, you must be prepared to use a canoe or boat to retrieve birds. Wounded diving ducks can travel a considerable distance underwater, so shooting "head up" fallen birds

to anchor them is both ethical and practical.

## Safety

Hunting from boats exposes you to a wide range of potential threats. Life jackets are an obvious must, but also carry a signal whistle, GPS, cell phone and a simple survival kit. Weather, accidents, or equipment failure can leave you stranded, and a few well-chosen accessories will save you a world of discomfort.

Shooting safety protocols should also be established when hunting from a boat. Will you stand or sit to shoot? Where is your “safe” zone for shooting, and where is your partner’s?

## Dress for Success

Days on the open water, particularly late in the season, can bring life-threatening weather in the blink of an eye. Dress for the worst possible weather; that means gloves, a toque and layered garments that ensure warmth and waterproofing. Wear chest waders, even when hunting from

ground blinds, as they provide insulation and protection from rain, sleet, waves and shaking retrievers. Proper clothing also means effective camouflage; don’t overlook the value of a camo mask or face paint.

Some suggest that if it’s not a mallard, it’s not that good on the table. That’s

nonsense. It’s all about how you prepare them—experiment in the kitchen a little and you’ll find that any species of duck can make for fine eating.

They say variety is the spice of life, and big water duck hunting is all about variety. ●

## Safety Is At Our Core

There are No Access, No Hunting and No Shooting safety boundaries clearly signed around all Teck operations and exploration sites in the Elk Valley.

For your safety and ours, please do not hunt or travel in the active mining or exploration areas.

Teck’s Elk Valley boundary maps are available at your local hunting or ATV Club and at the mine gatehouses.

To view the maps online, visit:  
[www.teck.com/coalmaps](http://www.teck.com/coalmaps)

# Getting Ready

by Al Voth

A particularly enjoyable part of any hunt is the preparation. This includes gear selection and purchasing, inspecting existing equipment, preparing guns and ammo, and even loading the truck. All these activities serve to build the anticipation we naturally feel when heading out on a new adventure. However, to really enjoy the preparation phase of a hunt, we need to get started early and not be in a frantic rush. This is particularly true when preparing a rifle and readying ourselves to use it.

## Prepare the Rifle

An important step in preparing a rifle is to make sure the gun/scope/ammo combination is delivering bullets to the point of aim. This sighting-in process is simple, but it does take some attention to detail, with a key element being the use of a solid shooting rest to help eliminate human induced variables.

Begin by firing three shots at a paper target set at the distance you want the rifle zeroed. If everything is working properly, you should have three shots in a cluster. If that's not the case, it indicates a problem, and that problem could lie with any element in the shooting system, even with the shooter.

*"Most hunting scopes require one click of either the windage or elevation turrets to move the point of impact 1/4-inch at 100 yards."*

Diagnosing and fixing the problem can be a long process, which is why it's so critical to carry out the sighting-in exercise well before the season starts.

Unfortunately, space limitations prevent me from discussing causes and fixes, so we'll have to assume the target reveals a decent cluster of shots. The next step is to measure the horizontal and vertical distance, in inches, to target centre. With that information in hand, we can calculate the necessary adjustment needed in the riflescope.

Most hunting scopes require one click of either the windage or the elevation turrets to move the point of impact 1/4-inch at 100 yards. The math is easy if you're sighting-in at that distance, but if it's something further, such as 200 yards, the distance each click moves the point of impact will double. Therefore, a group six inches high at 200 yards requires 12 clicks to move point of impact to centre.

Make the necessary adjustments to the rifle's scope and fire another three shots.

*continued on next page*

*"A support post can be used to simulate a tree or a fencepost."*

*"When practicing rapid follow-up shots, keep the rifle's butt firmly on the shoulder while cranking the bolt."*

But don't be surprised if these bullets don't find centre either, another sequence of measuring and scope adjustment is common. Just be sure to let the rifle's barrel cool completely between groups, making your sighting-in shots accurate reproductions of the rifle's condition in the field. When bullets finally cluster into the target's centre, the rifle system is ready; however, that's not the case for the shooter.

## Prepare Yourself

Be honest with yourself; when was the last time you went to the range and did some realistic practice? Not just sighting-in or load development; I mean real, honest-to-gosh practice? It's easy, fun, and critical to a successful hunt.

First, spend time thinking about previous seasons including the positions you shot from, and the distances involved. Those scenarios are what you need to simulate in your practice sessions. Personally, about ninety percent of my shots happen from a sitting position and distances are typically inside two hundred yards. Your situation may be different.

Second, take your hunting kit with you to the range. For me that means the backpack I habitually wear when hunting. I sit on its built-in seat, or I toss it on the ground for support during prone shooting, and when possible, I use a bipod for support. Practice using this rule: if you use it for shots in the field, use it at the range.

*"Take your hunting gear to the range, including seat and shooting supports."*

## Gun Options

Yes, I know. Ammo is expensive, can be hard to find, and firing more than three shots from a magnum calibre rifle hurts, and can produce a flinch. That's okay, and it's why practicing with a .22 rimfire is every bit as helpful as using a centrefire. Just reduce the target size accordingly to compensate for the shorter distances. Another option is to use a smaller centrefire, like a .223 Remington, for practice. They are far cheaper to shoot, easier on the ears and shoulder, can duplicate the trajectory of many large centrefire rifles, and do coyote hunting duties in the winter months.

## Targets

Whatever gun you use, make the effort to acquire some useful targets.

*"The .223 Rem. is an inexpensive practice round that will often match the trajectory of much larger cartridges."*

*"Take the time to think about all your past seasons and the way those shots were taken, then duplicate those situations in practice."*

They can be paper, steel, or something in between. The key is to ensure they provide immediate feedback with every shot fired. At closer ranges, usually inside 200 yards, it's possible with good optics to see bullet holes on paper, meaning you can fire a shot and immediately spot where the hit went. Paper tells us, with brutal honesty, if the shot was pulled or centered, and being able to spot the hit immediately ensures the shortest possible learning curve. Targets like Birchwood Casey's SHOOT-N-C are great because hits become so visible.

At longer distances, bullet holes can be tough to spot on paper, but reactive

targets, especially steel, will give you feedback and are fun to shoot. A shot of quick-drying spray paint improves target visibility at long range and helps in keeping track of where your shots have gone. Just make sure the size of your range targets is close to the vital size of the game hunted.

### Doing It

Now, all that's left is to do it. With your rifle zeroed, get off the bench and into a field position. Put your targets out at a realistic distance, assume a practical ready position, then acquire the target, and fire the shot. Evaluate

yourself. Could the shot have been better? Could you have delivered it faster? Try it again. Work on your weak points. Set a goal for yourself, both for accuracy and for speed.

At this point, having a friend along to spot and to compete against is a huge help. Set up an informal competition; put a little pressure on each other. After all, when a monster buck stops at the edge of a clearing for one last look and you must make the shot of your life, you'll likely feel some pressure. If the loser buys lunch, you can recreate pressure at the range too.

And don't forget to insert time as a variable. Given enough time, most shooters can hit a 400-yard steel target. But the shooter, who can go from a standing position to prone and hit that target in 10 seconds, is a better shot than the one who can do it in 20 seconds. Timing yourself and others is best done with a purpose-built shooting timer that emits a loud beep as a start signal and then detects the sound of the shot to stop a high-speed clock. These are necessary pieces of a kit in many shooting sports, but for hunters, a stopwatch will work fine.

To get the most from a practice session leave your ego at home. The accuracy you'll achieve from a kneeling or sitting position won't even be close to what you can do from the bench, making shooting from realistic field positions a humbling experience. However, if you abandon that crutch of a bench, you'll become a better field shot and will be putting meat on the ground when your friends are talking about the one they missed. ●

# The benefits of getting out and harvesting your own game

*by Kade and Carson McCormick*

---

**A**lberta provides some of the best opportunities in the world to hunt and harvest your own wild game. Every season offers a variety of available game, whether it is one of the many big game species, upland gamebirds, waterfowl, cranes, or small game we have here.

---

## Why Hunt?

Harvesting your own meat checks every box for being healthy and desirable; ethically and locally sourced, pure with no chemicals or additives, high in protein, low in fat, and fresh. Eliminating the need to purchase protein from a store adds to this wholesome experience and removes any uncertainty of the ethics behind the meat you are consuming.

Protein aside, harvesting your own game is an endeavor that contributes to your well-being. In a world of technology and consumerism where instant gratification dominates, too often we are deprived of learning how to escape, and how to work hard to find true happiness.

Outdoor pursuits challenge us both physically and mentally, and spending time in the outdoors can have a significant healing effect. Whether hiking the Rocky Mountains, glassing every ridge for a prized bighorn sheep, watching a sunrise on the marsh from a duck blind, or walking with your

*"There is no greater reward than the pursuit of hunting and the gratification that comes with harvesting your own wild game."*

# Eastern Irrigation District

## Public Access

The Eastern Irrigation District (EID) manages its land with a multi-use concept. Hunting is generally permitted on **EID owned Community Pastures** during the legal recreational hunting season by individuals with written permission and in possession of the appropriate recreational hunting licences.

The below conditions must be followed:

- Automobiles **must stay** on designated routes or established trails
- No off-highway vehicles
- Participate in the EID aquatic invasive species prevention program
- No camping or fires
- No hunting near livestock
- Leave gates as you found them
- **Obey all signs**, some areas have added restrictions

Access to these private lands is a privilege not a right, please  
**"USE RESPECT AND HUNT WITH CARE".**

Contact our office in Brooks for  
further information at  
403-362-1400 or [eid@eid.ca](mailto:eid@eid.ca)  
[www.eid.ca](http://www.eid.ca)

*"Hunting challenges you to push further in search of success."*

**1-800-642-3800**

dog in the coulees and grasslands in search of upland birds, hunting is not always successful if taking game is the only measure. Hunting challenges you to push further in search of success, and through this investment of time, patience, and effort, your successes—and failures—are extremely rewarding. Overcoming the uncertainties of harvesting an animal can be mitigated by ensuring you follow proper hunter ethics.

In addition, needing to better understand the habits of the game you're pursuing and the nature of the environment that you hunt creates a deeper connection for hunters. Getting lost in this pursuit provides an escape that is difficult to compete with.

## Becoming a Hunter/Harvester

Eating the game you harvest is much more enjoyable when you have learned a few tricks and methods to ensure its proper care, storage, and cooking. The results will ensure delight on your dinner plate. And here is where technology can help. Although hunting will help you escape it, technology provides a powerful source of information at the touch of a button (more aptly, a screen). If a mentor or friend is not there to help, there is a pretty good chance the Internet can lead you to your answer. At the end of the day, dining on tenderloin that you have harvested and prepared is another of the many rewards of hunting.

## From Field to Freezer

Ensuring that meat is kept cool will influence where you clean and process your kill. When it's cold enough outside to keep meat cool, you can transport your kill to where you'll butcher or hang it with the hide on. For ungulates, this will help prevent spoilage. You will want to gut and drain the animal in the field and haul it to your vehicle. Sleds and ropes can be a huge help, and sometimes the only way to budge an elk or moose. If you harvest a rutting male in freezing temperatures, keep the hide on and allow the meat to cool

slowly overnight. This will prevent cold shortening—a type of rigor mortis that’s impossible to reverse and renders an otherwise tender cut of meat extremely tough.

When it’s warm outside, you’ll have to work faster, and you may have to quarter your game and transport it in coolers. This is typical for backcountry hunting, particularly spring black bear and archery seasons. With birds and small game, taking it whole to your place of processing is much easier.

If you do not have the workspace necessary to cut and wrap your game, it may be best to take it to a butcher. With that in mind, it is possible to do a partial butchering and pass the rest of the work off to a professional. It doesn’t take a lot of research to learn to identify the main cuts of big game, and there are an endless number of resources to help you learn to correctly remove the roasts, steaks, organs, shanks, and so on from big game. Besides these cuts, the remainder is

*"If you don't have the tools to cut and wrap your game, it may be best to take it to a butcher."*

typically ground for burger or sausage. Sausage making can be long and tedious, and requires some additional equipment, so it’s quite popular to seek professional help at this stage.

Some of the best and least used cuts are the flatiron steaks, shanks, stew

meat, and the tongue. Flatiron steaks, or blade roasts, are located on the large side of the shoulder blade on all four legs. Shanks are below the knee, and can be removed for stew, as can meat from the neck. The tongue speaks for itself.

## 2021 WILD GAME FOR THE FOODBANK PROGRAM

**Only Elk, Moose, Deer and Antelope are eligible for donations.**

Thank you to everyone who participated in the Alberta Hunters Sharing the Harvest with the Foodbank Program in 2020. This is the twenty-fourth year of our program that has seen more than 295,000 pounds of high quality wild game donated to the Alberta Foodbanks. Please help us feed those in need again in 2021. All hunters and outfitters are encouraged to participate.

### Important Information:

1. We now accept donations from Oct 15, 2021 to Dec 15, 2021.
2. There are no extra wild game tags allotted for this program. You are asked to share the harvest from any one of the general season, supplementary or undersubscribed elk, moose, antelope or deer tags that are available.
3. Only elk, moose or deer that have been harvested between October 15 and December 15, 2021 during the regular hunting seasons are eligible for this program.
4. The elk, moose, deer or antelope cannot be completely frozen and it must be delivered to a participating meat processor within 72 hours from the time of harvest.
5. Please contact the processor to ensure whether the elk, moose, deer or antelope can be brought in skinned or unskinned.
6. There are no processing costs charged to the donating hunter. The processing costs are paid by the **Alberta Hunters Sharing the Harvest** association through financial donations by hunting organizations including our primary sponsors: **Alberta Chapters of Safari Club International, Alberta Conservation Association, and APOS Legacy Fund**

To find the complete donation guidelines and the list of participating meat processors, please call our 24 hour information line at 780-443-6006. Or you can visit the Hunting for Tomorrow website at [www.huntingfortomorrow.ca](http://www.huntingfortomorrow.ca). Our wild game donation information is found under their **Fact Sheets** section under **Wild Game Foodbank Donation Program**.

You can also contact the **Alberta Hunters Sharing the Harvest** Supervisor. Please contact:  
Ryan Grajczyk at 587-983-6687 or Jim Thomson at 780-691-8907.

**Thank you for sharing your harvest with those in need!!**

If you are butchering your own game, there will always be some waste. If your shot was too far forward in the vitals, you may lose the better part of a shoulder, ribs, or flanks from a moose or elk. You can take this “waste”, cut it thin, and dehydrate it for dog treats. Your dog will love them and you can feel more comfortable with only the bones being thrown out.

When it comes to cleaning game birds, when possible keep the skin on by plucking the bird, or even just plucking the breasts before removing them; your enjoyment of the table fare will be much greater. The skin adds a ton of taste and can be the difference in making the meat flavourful and enjoyable.

Once your game is butchered, the next step is to package it. Well-packaged foods can last a couple of years, while poorly packaged meats will not make it to the grilling season. We recommend using a vacuum sealer; although the bags can be expensive, the end product is unparalleled. Even cheap bags will have you on the track to enjoy your game for as long as you would like. The quality of your table fare relies mainly on this combination of steps to properly handle and store your harvest.

*“A plump pheasant prepared and ready for cooking.”*

### On the Table

Cooking your harvest is the icing on the cake. When it comes to wild game, there are many cookbooks and online resources available. Even experienced game chefs often refer to a recipe when they cook. We like to follow Hank Shaw; he has a blog and several books that outline the entire butchering process and provide time-tested recipes for a variety of game. Even if you don't have the exact ingredients, or are going for something different, the skeleton of a recipe will be there to ensure you are adding complimentary ingredients, and not over-cooking your game. Most game is meant to be cooked rare, but there are exceptions, such as cougar, bear, partridge and pheasants.

We hope that with this little bit of guidance, and by accessing other resources, you will be encouraged and successful. You're winning by simply getting out and experiencing the incredible hunting opportunities offered in Alberta. ●

# ADVENTUROUS. LIKE YOU.

A hunt that isn't a challenge? Not your style. You're out here to test yourself. We're right there with you. It's why Nosler has remained independent and family-owned for more than 70 years, so we can continue to produce bullets, brass, ammunition and rifles that deliver, no matter the challenge. If you're already shooting Nosler, thank you. If you're not, discover why you should, at [Nosler.com](http://Nosler.com).

# Recognizing Female Hunters in Alberta

by Rob Corrigan

**H**unting in Alberta has a long history with many well-established traditions, often passed on through generations of family and friends. Alberta offers many spectacular landscapes to hunt big game, game birds and waterfowl throughout our province. Opportunities to pursue such a variety of game is one of the reasons we are blessed to be able to pursue our shared passions. In recognition of this long and rich history, the Hunting, Fishing and Trapping Heritage Act was passed in 2008. The right to hunt, fish and trap in accordance with the law was enshrined in Alberta through the passage of this Act.

For the 2020 hunting season, more than 148,000 Albertans purchased a Wildlife Certificate and at least one hunting licence. This is an increase of almost 40,000 resident hunters compared to only 10 years ago. While most jurisdictions across Canada are seeing a decrease in the number of hunters, Alberta continues to see increases in the number of people partaking each fall in the wide variety of hunting seasons and opportunities available here.

One demographic contributing to the increase is the growing number of female

hunters. In 2020, female hunters in Alberta purchased more than 23,000 Wildlife Certificates, representing approximately 15% of all resident hunters. In 2015, roughly 13,500 female hunters purchased Wildlife Certificates, approximately 10% of resident hunters. In only five years, the number of female hunters has increased 50% and female hunters are becoming much more prevalent as they enjoy the comradery and harvest successes that motivate all hunters. It is for this reason that female hunters are highlighted on the cover of the 2021 Alberta Guide to Hunting Regulations.

In conjunction with Alberta Outdoorsmen magazine, Alberta Environment and Parks requested people to submit photos of female Albertan hunters actively participating in the hunt. In response, we received more than 100 submissions. It was difficult to select only four photos for our front cover with so many wonderful pictures of hunters enjoying their hunting experience. We hope you enjoy the pictures that highlight an increasingly important demographic in our hunting community, out pursuing their passion in our beautiful province. ●
