

## Marked Wildlife

Some species of wildlife are banded, collared or marked by other means in an ongoing effort to gain additional population biology information.

A person who kills a wildlife animal or finds a dead wildlife animal that has been fitted with a device for the purpose of tracking the animal's movements must submit a completed report provided by Fish and Wildlife.

Some of these marked wildlife, as well as certain nuisance animals (e.g., some black bears), may have received drugs for research purposes or to

facilitate their capture and handling. Any such animal will be marked with a tag advising that the meat of the animal should not be consumed before contacting Fish and Wildlife of Alberta Forestry and Parks.

### Report Waterfowl Leg Bands by Telephone or Internet

All waterfowl leg bands recovered in North America can now be reported by telephoning the toll-free number **1-800-327-BAND** (1-800-327-2263). Band recovery can also be reported by internet at the website [reportband.gov](http://reportband.gov).

## Wild Game Public Health Advisory

The wild game public health advisory for the Swan Hills area – originally issued on December 13, 1996, by the Provincial Health Officer – has been revised as a result of more extensive wild game testing. While recent test results confirm that eating wild game from the Swan Hills area poses no immediate threat to human health, it is recommended that individuals limit the amount of wild game eaten.

For more information contact Alberta Health and Wellness at 780-427-7164 or visit My Wild Alberta at [mywildalberta.ca/hunting/safety-procedures/harvested-wildlife-human-health.aspx](http://mywildalberta.ca/hunting/safety-procedures/harvested-wildlife-human-health.aspx).

# REPORT A POACHER

[www.reportapoacher.com](http://www.reportapoacher.com)

**1-800-642-3800**

## IMPORTANT THINGS TO KNOW:

Report A Poacher can be reached all day, every day.  
1-800-642-3800.

- All calls are kept strictly confidential and you can remain anonymous.
- If you see something that may be poaching, record as much information as possible:
  - Date and time
  - Location
  - Vehicle description and licence number
  - Description of who was involved in the crime
  - Details of the violation and any other details you can think of, no matter how insignificant they might seem
- The information you provide could lead to a conviction (and possibly a reward for your help).
- Poaching covers a wide range of violations including:
  - Fishing or hunting out of season
  - Night hunting
  - Hunting from the road
  - Exceeding limits
  - Hunting while intoxicated
  - Illegal sales of wildlife or fish
- The Report A Poacher line can also be used for reporting major violations to land and habitat such as tree harvesting or destruction of stream beds.
- Please familiarize yourself with Alberta's Hunting and Fishing regulations to help protect Alberta.

# CHRONIC WASTING DISEASE AND DEER MANAGEMENT

Chronic wasting disease (CWD) is a chronic degenerative and ultimately fatal prion disease of cervids (primarily mule deer in Alberta). It is not known to infect humans but health authorities advise against eating any animal known to have any prion disease. CWD occurs throughout much of eastern and central Alberta. Current previous information, including maps of known cases is available at [alberta.ca/chronic-wastingdisease-updates](http://alberta.ca/chronic-wastingdisease-updates).

Hunters and outfitters are key in assisting big game management by helping to reduce deer numbers and by providing heads from harvested deer in designated areas for the CWD surveillance program. Alberta began looking for CWD in wild deer in the hunting seasons in 1998. Since then, we have tested over 111,000 heads and found CWD in 4,603 mule deer, 818 white-tailed deer, 26 elk, and 8 moose.

**FOR 2023 : It is mandatory to submit the head of DEER harvested in the following WMUs: 148, 150, 151, 200, 234, 236, 728 and 730.**

**For game management purposes, we are interested in ANY DEER heads from WMU 503, 504, 505, 506, 509, 510, 514.**

**MULE DEER heads from WMU 108, 110, 212, 216, 221, 224, 246, 247, 248, 250, 300, 302, 303, 306, 308, 310, 312, 314, 316, 320, 402, 404, 508.**

**Antlers and skull plate can be removed from bucks before the head is submitted. For European mounts, in separate bags, collect a piece of brainstem from INSIDE the back of the skull AND all the tissues from the back of the throat. Put the two bags in a third bag and freeze.**

All heads for testing, including samples (as above), must have a green CWD label which gives each head a unique identification number. **Be sure to include either GPS or land location as well as WMU and your WiN number for each head.** When available, test results for each head are sent to the email address in the hunter's AlbertaRELM account.

## CARCASS DISPOSAL

All hunters should properly dispose of their harvested carcasses, particularly animals taken in the CWD Risk Area. Where possible, debone meat making sure you keep the required evidence of sex and species. Hunters may prefer to avoid the spinal cord when deboning. Leave remainder of carcass at the kill site. If the carcass is transported elsewhere, remove all useable meat, then burn, bury, or dispose of the remains in a landfill.

For more information about CWD, contact your local Fish and Wildlife office or visit [alberta.ca/chronic-wasting-disease](http://alberta.ca/chronic-wasting-disease).

Alberta Health recommends that deer from the CWD mandatory areas be tested for CWD. For more information about potential human health risks associated with CWD contact health authorities.

## BILL OF LADING – WILDLIFE (To be used when transporting wildlife taken by others)

DATE: \_\_\_\_\_

I \_\_\_\_\_ address: \_\_\_\_\_ Ph. # \_\_\_\_\_  
(print hunter's name)

give permission to \_\_\_\_\_ address: \_\_\_\_\_ Ph. # \_\_\_\_\_  
(print name of person transporting wildlife)

to transport \_\_\_\_\_  
(description of shipment including sex and species)

date of kill: \_\_\_\_\_ W.I.N. #: \_\_\_\_\_ Lic./Tag # \_\_\_\_\_

taken under authority of my \_\_\_\_\_  
(describe type of hunting licence)

This wildlife is to be transported from \_\_\_\_\_  
(point of origin)

to \_\_\_\_\_ on \_\_\_\_\_  
(destination) (date)

\_\_\_\_\_  
(signature of hunter)

\_\_\_\_\_  
(signature of person transporting the wildlife)
